1 Lead Plaintiff Ronald J. Solotruk (“Plaintiff”), individually and on behalf of all others  
2 similarly situated, by his undersigned attorneys, for his complaint against Defendants, alleges the  
3 following based upon personal knowledge as to Plaintiff and Plaintiff’s own acts, and upon  
4 information and belief as to all other matters based upon, *inter alia*, the investigation conducted  
5 by and through Plaintiff’s attorneys, which included, among other things, a review of the  
6 Defendants’ public documents, conference calls and statements made by Defendants; Defendants’  
7 filings with the United States Securities and Exchange Commission (“SEC”); press releases and  
8 news articles regarding defendant TriplePoint Venture Growth BDC Corp. (“TPVG” or the  
9 “Company”); and analyst reports and advisories about the Company and the industry within which  
10 it operates. Plaintiff believes that substantial additional evidentiary support will exist for the  
11 allegations set forth herein after a reasonable opportunity for discovery.

## **NATURE OF THE ACTION**

13        1. This is a federal securities class action on behalf of a class (the “Class”) consisting  
14 of all persons and entities other than Defendants that purchased or otherwise acquired TPVG  
15 common stock between May 4, 2022 and May 3, 2023, inclusive (the “Class Period”). The Action  
16 seeks to recover damages caused by Defendants’ violations of Sections 10(b) and 20(a) of the  
17 Securities Exchange Act of 1934 (the “Exchange Act”) and Rule 10b-5 promulgated thereunder  
18 against the Company; defendant James P. Labe (TPVG’s Chief Executive Officer (“CEO”))  
19 (“Labe”) and chairman of its board; defendant Sajal K. Srivastava (TPVG’s President, Chief  
20 Investment Officer (“CIO”), and a member of TPVG’s board) (“Srivastava”); and defendant Chris  
21 Mathieu (TPVG’s Chief Financial Officer (“CFO”)) (“Mathieu”).

22        2. TPVG is an externally managed, closed-end, non-diversified management  
23 investment company regulated as a business development company (“BDC”) under the Investment  
24 Company Act of 1940 (the “1940 Act”). Traditionally, business development companies are  
25 organizations that invest in small- and medium-sized companies, as well as distressed companies,  
26 with the goal of helping these firms grow in the initial stages of their development or regaining  
27 sound financial footing. TPVG belongs to a subset of BDCs, sometimes referred to as “venture

1 debt BDCs” or “venture lending BDCs,” which invest in start-ups with venture capital backing,  
 2 primarily by offering loans to the start-ups.

3       3. TPVG’s business, as further described below, focuses on investing, through loans  
 4 and equity investments, in “venture growth stage companies.” TPVG categorizes venture capital-  
 5 backed companies into five lifecycle stages of development: seed, early, later, venture growth, and  
 6 public. In TPVG’s nomenclature, then, “venture growth” companies represent start-ups in an  
 7 advanced stage of development, but which have not yet gone public, been acquired, or otherwise  
 8 exited the start-up ecosystem.

9       4. TriplePoint Capital LLC (“TPC”), which serves as the umbrella for Defendants  
 10 Labe and Srivastava’s “TriplePoint” brand. TPC is a Delaware limited liability company exempt  
 11 from registration under the 1940 Act which describes itself as the “global leader in venture  
 12 finance.” While TPVG primarily invests in venture growth stage companies by providing debt  
 13 financing, TPC “serve[s] venture capital-backed companies around the world and at every stage  
 14 of development” with both “debt and equity financing solutions.” Defendants Labe and Srivastava  
 15 co-founded TPC in 2003, prior to the creation of TPVG, and serve as TPC’s co-CEOs to this day.

16       5. Defendants Labe and Srivastava subsequently formed TPVG to serve as the  
 17 publicly-traded vehicle for TriplePoint’s venture debt business, focusing primarily on loans to  
 18 venture growth stage start-ups. After incorporating TPVG in 2013, Labe and Srivastava – serving  
 19 as TPVG’s CEO and chairman of the board, and TPVG’s President and CIO, respectively – guided  
 20 TPVG through its initial public offering in March 2014. At the time of the IPO, TPVG’s loan  
 21 portfolio consisted of “a select portfolio of investments in venture growth stage companies  
 22 originated through” TPVG’s “Sponsor,” TPC, and “consisting of funded debt and direct equity  
 23 investments, future funding obligations and warrants associated with both the funded debt  
 24 investments and future funding obligations,” per the offering materials.

25       6. Since its IPO, TPVG’s portfolio of investments in various start-up companies (the  
 26 “Portfolio Companies”) has expanded. The direction of TPVG’s investments is guided by its  
 27  
 28

1     “Adviser,” TriplePoint Advisers LLC (“TPA” or the “Adviser”),<sup>1</sup> which – like all other TriplePoint  
 2 entities – was co-founded by Defendants Labe and Srivastava and manages TPVG’s day-to-day  
 3 operations.

4         7.         TPA is a wholly owned subsidiary of, and inextricably linked to and dependent on,  
 5 TPC. For example, as disclosed in TPVG’s 2022 Form 10-K, TPA shares staff with TPC pursuant  
 6 to a Staffing Agreement; TPA “benefits from the relationships developed by TPC as part of its  
 7 TriplePoint Lifespan Approach”; and TPA “sources investment opportunities with TPC’s select  
 8 group of leading venture capital investors.” In addition to selecting Portfolio Companies for  
 9 TPVG’s investments, TPA is also responsible for “reviewing and structuring investment  
 10 opportunities for [TPVG], underwriting and performing due diligence on [TPVG’s] investments  
 11 and monitoring [TPVG’s] investment portfolio on an ongoing basis.”

12         8.         As disclosed in TPVG’s 2022 Form 10-K, Defendants Labe and Srivastava both  
 13 “have a material pecuniary interest in [TPA] and serve on [TPA’s] Investment Committee” – of  
 14 which they appear to be the only members.<sup>2</sup>

15         9.         Through their senior positions at each of the various affiliated TriplePoint entities,  
 16 Defendants Labe and Srivastava have exercised control over all material aspects of TPVG’s  
 17 business and operations at all material times, as described further below. In addition, Defendant  
 18 Chris Mathieu serves as CFO for both TPVG and TPC.

19         10.        In contrast to many venture capital (“VC”) funders who focus primarily on making  
 20 equity investments, TPVG’s business model has focused primarily on investing in venture growth  
 21 stage start-ups through lending them money or otherwise acquiring their debt instruments. To the  
 22 extent that TPVG has acquired an equity interest in a company in which it invests, it has done so  
 23 primarily through “equity kickers” (e.g., through warrants, or through limited direct equity  
 24 purchases in parallel equity offerings) that are significantly smaller in size than TPVG’s larger

---

25  
 26         <sup>1</sup>         TPA was initially organized in 2013 as TPVG Advisers LLC. Its name was changed to TriplePoint Advisers  
 27         LLC in 2018.  
 28         <sup>2</sup>         TPVG’s 2022 Form 10-K states that “[t]he Investment Committee, ***comprised of Mr. Labe and Mr. Srivastava***, who are also members of the Adviser’s senior investment team, holds votes to approve any proposed investment transaction, including follow-on investments.”

1 debt stakes in that company. Accordingly, at all material times, the vast majority of TPVG's  
 2 investment portfolio has been comprised of its loans to venture growth stage companies.

3       11. Because loans comprise the vast bulk of TPVG's investment portfolio, TPVG's  
 4 own value is almost entirely dependent on the value of its loans to the venture growth stage  
 5 companies it has funded (the "Portfolio Companies").

6       12. TPVG regularly touts the quality of its investment portfolio in public statements.  
 7 In its 2022 Form 10-K, for example, TPVG claims it makes investments that it "believes have a  
 8 low probability of loss" based on its adviser's expertise "and the revenue profile, product  
 9 validation, customer commitments, intellectual property, financial condition and enterprise value  
 10 of the potential opportunity." TPVG also states that it "utilize[s] a disciplined investment process"  
 11 and that all of its investments are subject to "rigorous and established investment selection and  
 12 underwriting criteria." On earnings calls and in other public statements, Defendants similarly refer  
 13 to their investments as "high quality" on a regular basis.

14       13. Most (if not all) of the Portfolio Companies in which TPVG has invested are non-  
 15 public. In the absence of a public market for the Portfolio Companies' securities, TPVG  
 16 represented to its investors (including the members of the Class) during the Class Period that the  
 17 fair value of TPVG's loans was "determined in good faith by [TPGV's] Board, with the assistance  
 18 of [TPA] and independent valuation agents, in accordance with Rule 2a-5 of the 1940 Act and  
 19 GAAP, and in accordance with our valuation policy approved by the Board."

20       14. Unfortunately, because the investing public has almost no visibility into the actual  
 21 prospects of the kinds of privately-held start-up ventures in which TPVG has invested, at all  
 22 relevant times TPVG's investors have been totally dependent on TPVG to accurately value the  
 23 loans it has made to its Portfolio Companies. Per TPVG's 2022 Form 10-K, and as discussed  
 24 further below, TPVG's board takes into account varying types of factors in assessing the fair value  
 25 of its loans, including, "as appropriate, such factors as yield, maturity and measures of credit  
 26 quality, the enterprise value of the company, the nature and realizable value of any collateral, the  
 27 company's ability to make payments and its earnings and discounted cash flow, our assessment of  
 28

1 the support of their venture capital investors, the markets in which the company does business,  
 2 comparisons to similar publicly traded companies and other relevant factors.”

3       15. TPVG reports in each of its quarterly filings on the fair value of its loans to the  
 4 Portfolio Companies, and these fair value estimates are one of relatively few approximations of  
 5 the loan portfolio’s value available to TPVG’s investors. Another is the credit risk category  
 6 assigned to the various Portfolio Companies – one (“Clear”) through five (“Red”) – though TPVG  
 7 rarely makes public the credit risk category associated with any particular Portfolio Company, and  
 8 most often only on a downgrade or upgrade of a company’s credit risk. TPVG also reports higher-  
 9 level figures on a quarterly basis, like the amount of TPVG’s actual quarterly net unrealized gains  
 10 on investments, and the amount of TPVG’s actual quarterly net increase in net assets resulting  
 11 from operations.

12       16. Unlike the public, Defendants are privy to a wealth of information regarding the  
 13 Portfolio Companies, their finances, and their business operations as a result of the disclosures the  
 14 companies are required to make under their loan agreements with TPVG. Defendants closely  
 15 monitor the Portfolio Companies’ operations, a fact which they use as a selling point, as in TPVG’s  
 16 most recent Form 10-K:

17       Our Adviser utilizes ***an extensive internal credit tracking and monitoring approach to regularly follow a borrower’s actual financial performance and achievement of business-related milestones*** to ensure that the internal risk rating  
 18 assigned to each borrower is appropriate. This process has been refined and validated by Mr. Labe and Mr. Srivastava, and the track record developed by TPC since its inception and is based in part on its expertise and deep understanding of the risk associated with investing in various stages of a venture capital-backed company’s lifespan.  
 19 That “monitoring approach” includes the assignment of a dedicated team assigned to each Portfolio  
 20 Company responsible for reviewing documents received from it “on a monthly or quarterly basis,”  
 21 as well as the regular review, on a quarterly or even a weekly basis, by TPA’s Investment  
 22 Committee and senior investment team of the dedicated teams’ reports.

23       17. Defendants are thus acutely aware of any material changes in the Portfolio  
 24 Companies’ fortunes in close to real time, especially since TPA’s Investment Committee  
 25 (comprised of Defendants Labe and Srivastava) “review[s] material events and information on

[TPVG's] borrowers and discuss[es] in detail those borrowers that are performing below expectations" on a weekly basis.

3        18. Beginning in May 2022 and into May 2023, a number of TPVG’s Portfolio  
4 Companies began to struggle as the broader venture capital ecosystem started to weaken. Though  
5 Defendants learned of the Portfolio Companies’ struggles in close to real time, they continued to  
6 refer to their loan investments and companies as “high quality,” and dismissed any early warning  
7 signals (like one Portfolio Company’s bankruptcy in late 2022) as anomalies. Defendants likewise  
8 continued to report high valuations for the loans in their portfolio and avoided downgrading the  
9 credit risk of TPVG’s Portfolio Companies until doing so became unavoidable. In short,  
10 Defendants endeavored to conceal the deterioration of their debt investments and Portfolio  
11 Companies from TPVG’s investors.

12           19. Defendants thus (a) failed to disclose material adverse facts concerning the decay  
13 in TPVG's financial condition and prospects, including the material decay in TPVG's investment  
14 portfolio; (b) misrepresented the true quality of TPVG's various Portfolio Companies and loan  
15 book, as well as the viability of its overall investment strategy; and (c) overstated the quarter-end  
16 value of TPVG's investment portfolio, the amount of TPVG's actual quarterly net unrealized gains  
17 on investments, and the amount of TPVG's actual quarterly net increase in net assets resulting  
18 from operations. After the truth began to emerge as discussed below in IV, TPVG's stock price  
19 took a substantial hit.

20        20. By this Action, Plaintiff, on behalf of himself and the Class he seeks to represent,  
21 seeks to recover damages for the significant losses suffered as a result of Defendants' wrongful  
22 conduct.

## **JURISDICTION AND VENUE**

24        21. The claims asserted herein arise under and pursuant to Sections 10(b) and 20(a) of  
25 the Exchange Act (15 U.S.C. §§78j(b) and 78t(a)) and Rule 10b-5 promulgated thereunder by the  
26 SEC (17 C.F.R. §240.10b-5).

27        22. This Court has jurisdiction over the subject matter of this action pursuant to 28  
28 U.S.C. §1331 and Section 27 of the Exchange Act.

1       23.     Venue is proper in this District pursuant to Section 27 of the Exchange Act (15  
2 U.S.C. §78aa) and to 28 U.S.C. §1391(b). TPVG is headquartered in this District, Defendants  
3 conduct business in this District, and a significant portion of Defendants' activities took place  
4 within this District.

5       24. In connection with the acts alleged in this complaint, Defendants, directly or  
6 indirectly, used the means and instrumentalities of interstate commerce, including, but not limited  
7 to, the mails, interstate telephone communications, and the facilities of the national securities  
8 markets.

## **PARTIES**

10        25. Plaintiff Solotruk, as set forth in his previously-filed certification, acquired TPVG  
11 common stock at artificially inflated prices during the Class Period, and was damaged thereby.

12        26. Defendant TPVG is a Maryland corporation with its principal executive offices  
13 located at 2755 Sand Hill Road, Suite 150, Menlo Park, California 94025. TPVG's common stock  
14 trades in an efficient market on the Nasdaq Global Select Market ("NASDAQ") under the ticker  
15 symbol "TPVG."

16        27. Defendant James P. Labe has served as TPVG's CEO and Chairman of its Board  
17 of Directors since TPVG was formed in June 2013. Labe was an architect and primary beneficiary  
18 of the scheme alleged herein, and personally made many of the false and misleading statements  
19 alleged herein during the Class Period. As TPVG's CEO and Chairman, the co-founder and co-  
20 CEO of TriplePoint Capital, and the co-founder of TPA, Labe had a significant amount of insight  
21 into and sway over TPVG's valuation of the Portfolio Companies.

22        28. Defendant Sajal Srivastava has served as TPVG’s President and CIO since TPVG  
23 was formed in June 2013. Srivastava was an architect and primary beneficiary of the scheme  
24 alleged herein, and personally made many of the false and misleading statements alleged herein  
25 during the Class Period. As TPVG’s President and CIO, the co-founder and the co-CEO of  
26 TriplePoint Capital, and the co-founder of TPA, Srivastava had a significant amount of insight into  
27 and sway over TPVG’s valuation of the Portfolio Companies.

1       29.     Defendant Christopher Mathieu has served as TPVG's and TriplePoint Capital's  
2 CFO since 2019. Mathieu was an architect and primary beneficiary of the scheme alleged herein,  
3 and made many false and misleading statements alleged herein during the Class Period. As the  
4 CFO for both TPVG and TriplePoint Capital, Mathieu had a significant amount of insight into and  
5 sway over TPVG's valuation of the Portfolio Companies.

6       30. Defendants Labe, Srivastava, and Mathieu are sometimes collectively referred to  
7       herein as the “Individual Defendants.”

8        31. The Individual Defendants possessed the power and authority to control the  
9 contents of TPVG's SEC filings, press releases, and other market communications. The Individual  
10 Defendants were provided with copies of TPVG's SEC filings and press releases alleged herein to  
11 be misleading prior to or shortly after their issuance, and had the ability and opportunity to prevent  
12 their issuance or to cause them to be corrected. Because of their positions with TPVG and TPC  
13 (and also, in the case of Defendants Labe and Srivastava, because of their positions with TPA) and  
14 their access to material information available to them but not to the public, the Individual  
15 Defendants knew that the adverse facts specified herein had not been disclosed to, but were being  
16 concealed from, the public, and that the positive representations made during the Class Period were  
17 materially false and misleading when made. The Individual Defendants are liable for the false and  
18 misleading statements and omissions pleaded herein.

## **SUBSTANTIVE ALLEGATIONS**

20 | I. BACKGROUND

#### A. TPVG and the TriplePoint Platform

22        32. TPVG is an externally managed, closed-end, non-diversified management  
23 investment company regulated as a business development company under the Investment  
24 Company Act of 1940, as amended, or the “1940 Act.” TPVG was “formed to expand the venture  
25 growth stage business segment of TriplePoint Capital LLC, [its] Sponsor, as part of its investment  
26 platform and will be the primary vehicle through which [TPC] focuses its venture growth stage  
27 business.”

1       33. TPVG's website touts its "unique relationship" with its sponsor, TPC, claiming that  
 2 TPVG "[b]enefits from TriplePoint Capital's strong brand name, reputation, track record, industry  
 3 relationships, and direct originations capabilities," and describing TPC as being "widely  
 4 recognized as a leading global financing provider devoted to serving venture capital-backed  
 5 companies with creative, flexible and customized debt financing, equity capital and  
 6 complementary services throughout their lifespan." TPC's website describes TPVG as one arm of  
 7 the "TriplePoint Capital Platform," which TPC claims is "unique in the industry" and "consists of  
 8 large and diversified sources of capital giving us the capacity and scale to meet all of your evolving  
 9 needs throughout the lifespan of your company." TPVG disclosed in its 2022 Form 10-K that  
 10 TPVG "co-invest[s] from time to time, and intend[s] to continue making co-investments, with TPC  
 11 and/or investment funds, accounts and vehicles managed by TPC or its affiliates where doing so  
 12 is consistent with [TPVG's] investment strategy as well as applicable law and SEC staff  
 13 interpretations."<sup>3</sup>

14       34. While TPC provides both debt and equity financing solutions, TPVG is primarily  
 15 focused on lending money to late-stage (*i.e.*, "venture growth" stage) start-up companies at high  
 16 interest rates. TPVG "[i]nvest[s] in primarily secured, growth capital loans with targeted returns  
 17 between 10% and 18%." During the Class Period, certain loans that TPVG made came with equity  
 18 "kickers," such as equity options in the form of warrants, and occasionally TPVG made direct  
 19 equity investments. At all relevant times, however, the debt (loan) portions of TPVG's investment  
 20 portfolio were far greater than the equity portions.

21       35. TPVG's net asset value is essentially the value of its loans to, plus the value of its  
 22 (significantly smaller) equity investments in its Portfolio Companies. During the class period,  
 23 anywhere from 86.3% (Q1 2022) to 90.6% (Q1 2023) of TPVG's investments at fair value were  
 24 comprised of its loans to Portfolio Companies.

25  
 26       

---

  
 27       <sup>3</sup> One such co-investor is TriplePoint Private Venture Credit Inc. ("TPPVC"), an externally managed, closed-  
 28 end, non-diversified management investment company incorporated in Maryland that has elected to be regulated as a  
 business development company under the 1940 Act. TPPVC, like TPVG, was co-founded by Defendants Labe and  
 Srivastava, is sponsored by TPC, is advised by TPA, and focuses on debt investments. Unlike TPVG, it targets a  
 broader range of companies (lending to early, later, and venture growth stage start-ups) and is not publicly traded.

1           **B. The Role of TPVG's Adviser**

2       36. As noted above, TPVG's investments are guided by its "Adviser" – TriplePoint  
 3 Advisers LLC, referred to herein as "TPA." In its 2022 Form 10-K, TPVG represented that it  
 4 "make[s] investments that [TPA]'s senior investment team believes have a low probability of loss  
 5 due to their expertise and the revenue profile, product validation, customer commitments,  
 6 intellectual property, financial condition and enterprise value of the potential opportunity." TPA  
 7 is a wholly owned subsidiary of TPVG's sponsor, TPC. Like TPC and TPVG, TPA was co-  
 8 founded by Defendants Labe and Srivastava, who together comprise TPA's Investment Committee  
 9 and lead TPA's senior investment team.

10      37. TPA "is responsible for sourcing, reviewing and structuring investment  
 11 opportunities for [TPVG], underwriting and performing due diligence on [TPVG's] investments  
 12 and monitoring [TPVG's] investment portfolio on an ongoing basis." TPA renders its services to  
 13 TPVG pursuant to an investment advisory agreement, under which TPVG pays TPA a  
 14 management fee equal to 1.75% of TPVG's investment assets. TPA also receives an incentive fee  
 15 if certain conditions are met.<sup>4</sup>

---

16  
 17  
 18      4      The details of TPA's incentive fee structure are set forth in TPVG's 2022 Form 10-K:  
 19      The incentive fee, which provides our Adviser with a share of the income that it generates for us,  
 20      consists of two components—investment income and capital gains—which are largely independent  
       of each other, with the result that one component may be payable even if the other is not payable.

21      Under the investment income component, we pay our Adviser each quarter 20.0% of the amount by  
 22      which our pre-incentive fee net investment income for the quarter exceeds a hurdle rate of 2.0%  
 23      (which is 8.0% annualized) of our net assets at the end of the immediately preceding calendar  
       quarter, subject to a "catch-up" provision pursuant to which our Adviser receives all of such income  
 24      in excess of the 2.0% level but less than 2.5% and subject to a total return requirement. . . . [A]ny  
       investment income incentive fee that is payable in a calendar quarter is limited to the lesser of (i)  
 25      20.0% of the amount by which our pre-incentive fee net investment income for such calendar quarter  
       exceeds the 2.0% hurdle rate, subject to the "catch-up" provision and (ii) (x) 20.0% of the  
 26      cumulative net increase in net assets resulting from operations since March 5, 2014 minus (y) the  
       cumulative incentive fees accrued and/or paid since March 5, 2014. . . .

27      Under the capital gains component of the incentive fee, we pay our Adviser at the end of each  
 28      calendar year (or upon termination of the Investment Advisory Agreement) 20.0% of our aggregate  
       cumulative realized capital gains from inception through the end of that year, computed net of our  
       aggregate cumulative realized capital losses and our aggregate cumulative unrealized losses through  
       the end of such year, less the aggregate amount of any previously paid capital gain incentive fees.

1       38. In its 2022 Form 10-K, TPVG describes the services rendered by TPA under the  
 2 Investment Advisory Agreement as follows:

3             Subject to the overall supervision of our Board and in accordance with the 1940  
 4 Act, [TPA] manages our day-to-day operations and provides investment advisory  
 5 services to us. Under the terms of the Investment Advisory Agreement, [TPA]:

- 6             • determines the composition of our portfolio, the nature and timing  
                of the changes to our portfolio and the manner of implementing such  
                changes;
- 7             • identifies, evaluates and negotiates the structure of the investments  
                we make;
- 8             • executes, closes, services and monitors the investments we make;
- 9             • determines the securities and other assets that we will purchase,  
                retain or sell;
- 10            • performs due diligence on prospective investments; and
- 11            • provides us with such other investment advisory, research and  
                related services as we may, from time to time, reasonably require  
                for the investment of our funds.

12       39. TPVG thus delegates the bulk of its operations to TPA. It is TPA that sets the  
 13 “rigorous and established investment selection and underwriting criteria” which potential Portfolio  
 14 Companies must meet before TPA will direct TPVG to invest in them, and it is TPA that exercises  
 15 its judgment, in many cases, to determine whether these underwriting criteria are met. For  
 16 example, according to TPVG’s 2022 Form 10-K, whether or not a potential Portfolio Company  
 17 has a “strong likelihood of raising additional equity capital or achieving an exit in the form of an  
 18 initial public offering or sale” is determined by TPA “and its investment experience and history of  
 19 investing in venture growth stage companies.” Likewise, “the opinion of [TPA]’s senior  
 20 investment team” can guide a determination as to whether or not a potential Portfolio Company  
 21 has the requisite “meaningful enterprise value or the potential for meaningful growth in enterprise  
 22 value relative to the size of [TPVG’s] investment.”

23       40. TPVG’s 2022 Form 10-K further states that TPA evaluates “both qualitative and  
 24 quantitative analysis and assessment” as part of its “rigorous diligence and credit analysis process.”  
 25 Its due diligence process “typically includes visits by [a TPA professional] to a prospective  
 26 borrower’s headquarters and other facilities, interviews with key management and board members

1 and reference checks on senior management,” and “may include discussions with key industry  
 2 research analysts, other industry participants, customers and suppliers, where appropriate.” A TPA  
 3 professional “also typically reviews the prospective borrower’s organizational documents and  
 4 structure, capital structure, assets, liabilities, employee plans, key customer or supplier contracts,  
 5 legal and tax matters and other relevant legal documentation” before preparing and submitting “a  
 6 detailed credit and due diligence memorandum describing and analyzing the proposed transaction,  
 7 as well as the outcome of the diligence and credit analysis activities,” to TPA’s Investment  
 8 Committee and senior investment team in advance of their meetings.

9       41.     The ultimate determination as to whether or not TPVG will invest in a potential  
 10 Portfolio Company is made by Defendants Labe and Srivastava: “The Investment Committee,  
 11 comprised of Mr. Labe and Mr. Srivastava, who are also members of the Adviser’s senior  
 12 investment team, holds votes to approve any proposed investment transaction, including follow-  
 13 on investments.”

14       **C.     The Ongoing Monitoring and Management of TPVG’s Investments in  
 15 the Portfolio Companies**

16       42.     Defendants Labe and Srivastava, in their TPA capacities, also continuously monitor  
 17 TPVG’s portfolio investments. For example, as described in TPVG’s 2022 Form 10-K, as part of  
 18 its “active portfolio management process,” TPA evaluates qualitative and quantitative metrics (like  
 19 “the outlook for the borrower’s industry segment, progress of product development, overall  
 20 adherence to the business plan, financial condition, future growth potential and ability to raise  
 21 additional equity capital”) and “maintains dialogue and contact with our borrowers’ management  
 22 teams to discuss, among other topics, business progress, cash flow, financial condition and capital  
 23 structure matters.”

24       43.     The monitoring process includes having a dedicated team of TPA employees  
 25 assigned to each Portfolio Company, with one member of the team responsible for “review[ing]  
 26 the [Portfolio Company’s] various financial statements, compliance reports and other documents  
 27 received from [the Portfolio Company] on a monthly or quarterly basis, as well as any publicly  
 28 filed financing statements, such as UCC financing statements and press releases,” all of which that

1 team member enters “into [TPA]’s proprietary client-management platform for review by the rest  
 2 of the Portfolio Company Team.”

3       44. The team’s findings are then presented to TPA’s management, as TPA’s  
 4 “Investment Committee [*i.e.*, Defendants Labe and Srivastava] and [TPA’s] senior investment  
 5 team review material events and information on [TPVG’s] borrowers and discuss in detail those  
 6 borrowers that are performing below expectations” on a weekly basis. Portfolio Companies are  
 7 all subject to “an extensive re-evaluation” on a quarterly basis, which results in the preparation of  
 8 a “portfolio update” that addresses key topics like “timing/status of the next equity financing  
 9 round, cash balance and burn rate, financial and operational progress, and covenant adherence.”  
 10 Moreover, “[a]ll of these meetings are typically ***attended by one or more members of our***  
 11 ***Adviser’s Investment Committee*** [*i.e.*, Defendants Labe and Srivastava], senior investment team  
 12 and the Portfolio Company Team for the specific borrower being reviewed.”

13       45. With respect to struggling Portfolio Companies, TPA engages in more direct  
 14 intervention:

15       If the outlook for a borrower, its industry or a borrower’s available cash balance or  
 16 credit rating is materially deteriorating, or there is material downturn in the  
 17 borrower’s standing since our last review, we change the standing of the borrower  
 18 on our Credit Watch List . . . Originations and Investment and Credit Analysis  
 19 Professionals contact the borrower and its venture capital investors to discuss and  
 20 understand any changes. . . . ***[TPA then] assesses each borrower on our Credit***  
***Watch List and . . . determines the appropriate course of action***, including  
 21 decisions to enforce our rights and remedies, modify or waive a provision of our  
 22 investments, declare a default, request early pay-off, or wait for an external event,  
 23 such as an acquisition or financing, to restructure a secured loan or receive  
 24 additional consideration in the form of fees or warrant investments. ***In a worst-***  
***case scenario, a member of our Portfolio Company Team sells collateral with the***  
***help of management, repossesses and auctions assets or negotiates and structures***  
***other potential outcomes.***

25       46. Other portions of TPVG’s 2022 Form 10-K further confirms that Defendants Labe  
 26 and Srivastava could also play an active role in the management and direction of the Portfolio  
 27 Companies themselves. For example, the Form 10-K discloses that “the principals of [TPA] may  
 28 be called upon to provide and currently do provide significant managerial assistance to portfolio  
 companies and other investment vehicles which are managed by [TPA].”

1       47. Defendants Labe and Srivastava are also kept regularly apprised of matters relating  
 2 to TPVG's Portfolio Companies in their capacities as members of TPVG's board of directors. Per  
 3 TPVG's 2022 Form 10-K, TPA provides TPVG's board of directors with "the most recent and  
 4 available information" on the Portfolio Companies as part of the valuation process, "which  
 5 generally includes industry outlook, capitalization, financial statements and projected financial  
 6 results of each portfolio company."

7       48. TPA, Labe, and Srivastava's extensive access to information contained in the  
 8 Portfolio Companies' financials and to their other relevant business information (including  
 9 budgets, operating plans and updates on material operational contingencies) is confirmed by  
 10 provisions contained in a growth capital loan agreement to which TPVG and Underground  
 11 Enterprises, Inc. (a Portfolio Company) were parties,<sup>5</sup> and which Plaintiff believes contains  
 12 TPVG's standard loan conditions. Based on this document, and in line with TPVG's public  
 13 representations regarding how TPVG obtained insight into its Portfolio Companies' business and  
 14 financial condition, it appears that TPVG's standard loan agreements contain, in words or  
 15 substance, the following standard loan conditions:

16       [12(a)](viii) **Financial Statements.** Each of You [*i.e.*, the borrower(s)] will provide  
 17 **monthly and yearly financial statements** in accordance with Section 18(c) of this  
 18 Agreement, and such financial statements will include **reports of any material**  
**contingencies** (including commencement of any material litigation by or against  
 You) or any other occurrence that could reasonably be expected to have,  
 19 individually or in the aggregate, a Material Adverse Effect.  
 20       ...

21       [18(c)](i) **Financial Statements.**

22       (A) Within thirty (30) days after the end of each month, each of You will  
 23 provide Us [*i.e.*, the lenders, including TPVG, and the collateral agent  
 24 collectively] with (1) an unaudited income statement, statement of cash  
 25 flows, and an unaudited balance sheet prepared in accordance with GAAP  
 (except for the absence of footnotes and subject to year-end adjustments)  
 accompanied by a report detailing any material contingencies, and (2)  
**copies of all board packages delivered to the board of directors** of any of  
 You in connection with board meetings or otherwise.

26       (B) Within one hundred eighty (180) days of the end of each fiscal year end,  
 27 each of You will provide Us with audited financial statements accompanied

---

28       <sup>5</sup> The growth capital loan agreement was obtained from the bankruptcy court file in *In re Pheno Wine  
 Company, Inc.*, Case No. 23-10554, ECF No. 170-1 (Bankr. D. Del. Sept. 6, 2023).

1 by an audit report and an unqualified opinion of the independent certified  
 2 public accountants.

3 (C) Within thirty (30) days prior to the end of each fiscal year, each of You  
 4 will provide Us a **budget and business plan** for the next fiscal year.

5 (D) Each of You will provide Us **any additional information (including,**  
 6 **but not limited to, tax returns, income statements, balance sheets and**  
**names of principal creditors) as We reasonably believe are necessary to**  
**evaluate the continuing ability of each of You to meet Your financial**  
**obligations to Us.**

7 The loan agreement also contains a provision entitling the lender's collateral agent to request audits  
 8 and inspections with reasonable notice.

9 49. The terms set forth above, in words or substance, were standard terms of TPVG's  
 10 lending arrangements, and included in all of its funding agreements with each of its Portfolio  
 11 Companies.

12 50. In addition to highlighting the wealth of financial and business information which  
 13 Portfolio Companies are required to provide TriplePoint,<sup>6</sup> the loan agreement for Underground  
 14 Enterprises also serves as an example of TriplePoint's "co-investment" model. For example, the  
 15 cited loan agreement included was between Underground Enterprises as "Lead Borrower,"  
 16 TPPVC (a private TriplePoint affiliate with a similar, though not identical, business model as  
 17 TPVG's, *see fn. 3 above*) as "collateral agent," and three affiliated TriplePoint lenders, which  
 18 included not only TPVG, but also TPPVC (as both lender and collateral agent) and TriplePoint  
 19 Venture Lending Fund, LLC. TPA actually signed the agreement on behalf of all three lenders in  
 20 its capacity as investment adviser for each.<sup>7</sup>

21 51. The loan agreement makes clear that the borrower is to provide "Us" – defined as  
 22 the "Lenders and Collateral Agent, collectively" – with the requisite information. Accordingly,  
 23

---

24  
 25 <sup>6</sup> From time to time, the term "TriplePoint" is used herein to refer collectively to all TPVG-affiliated lenders  
 26 on a given transaction where more than one TPVG-affiliated TriplePoint entity (in addition to TPVG) lent money to  
 27 or otherwise invested in a Portfolio Company. In those instances, where possible, this Complaint also endeavors to  
 separately identify the dollar amount of TPVG's share in the transaction, even though the total deal value may have  
 been greater because of the participation of other TriplePoint entities.

28 <sup>7</sup> Between the bankruptcy filings and TPVG's SEC filings, it appears that TriplePoint-affiliated companies  
 collectively loaned \$8 million to Underground Enterprises, of which \$6 million was loaned by TPVG.

1 inasmuch as TPVG would often join with one or more other affiliated TriplePoint entities  
 2 (including but not limited to TPC) in making loans to a given Portfolio Company, regardless of  
 3 which TriplePoint-affiliated entity might serve as collateral agent on a given deal, as a practical  
 4 matter TPVG (and the Individual Defendants) would have had the same ability to compel audits  
 5 of and obtain information from the Portfolio Companies in which TPVG invested as any other  
 6 TriplePoint entity, if not directly then via a collateral agent that TriplePoint also controlled.

7           **D. TPVG's Assessment and Public Disclosures of the Value of Its Loans  
 8 to Portfolio Companies**

9       52. TPVG periodically discloses certain summary information regarding the health and  
 10 collectability of its various Portfolio Company loans. During the Class Period, that information  
 11 was primarily provided in the form of quarterly statements of each loan's fair value in TPVG's  
 12 quarterly 10-Qs, and in updates provided in TPVG's quarterly earnings releases and as  
 13 supplemented by commentary provided during quarterly conference calls, regarding the credit risk  
 14 "categories" that had been assigned to such loans.

15       53. With respect to the credit risk categories, TPVG's 2022 Form 10-K states that TPA  
 16 "utilizes an extensive internal credit tracking and monitoring approach to regularly follow a  
 17 borrower's actual financial performance and achievement of business-related milestones to ensure  
 18 that the internal risk rating assigned to each borrower is appropriate."

19       54. TPVG's "internal risk ratings" are reflected in each Portfolio Company's "credit  
 20 risk category," with each Portfolio Company being assigned one of the following categories by  
 21 TPA "[c]onsistent with TPC's existing policies." The categories are as follows:

<b>Category</b>	<b>Definition</b>	<b>Action Item</b>
Clear (1)	Performing above expectations and/or strong financial or enterprise profile, value or coverage.	Review quarterly.
White (2) <sup>8</sup>	Performing at expectations and/or reasonably close to it. Reasonable financial or enterprise profile, value or coverage. Generally, all new loans are initially graded White (2).	Contact portfolio company periodically; in no event less than quarterly.

27  
 28       8 Per TPVG's 2022 Form 10-K, "all new loans are generally assigned a rating of 2."

1	Yellow (3)	Performing generally below expectations and/or some proactive concern. Adequate financial or enterprise profile, value or coverage.	Contact portfolio company monthly or more frequently as determined by our Adviser's Investment Committee; contact venture capital investors.
2	Orange (4)	Needs close attention due to performance materially below expectations, weak financial and/or enterprise profile, concern regarding additional capital or exit equivalent.	Contact portfolio company weekly or more frequently as determined by our Adviser's Investment Committee; contact venture capital investors regularly; our Adviser forms a workout group to minimize risk of loss.
3	Red (5)	Serious concern/trouble due to pending or actual default or equivalent. May experience partial and/or full loss.	Maximize value from assets.

9           55. TPA purportedly evaluates each Portfolio Company's assigned category on a  
10 quarterly basis, and TPVG reports quarterly on the distribution of Portfolio Companies in each  
11 category (by number and aggregate loan amounts) every quarter. For example, in its Q1 2022  
12 Form 10-Q, TPVG reported that 7% of its total debt investments, representing four Portfolio  
13 Companies, were rated as Clear (1); 85.1% of its total loans to 40 Portfolio Companies were rated  
14 White (2); 6.5% of the total and three Companies were rated Yellow (3); 1.4% and one Portfolio  
15 Company was rated Orange (4); and none were rated Red (5). Although the category assigned to  
16 each Portfolio Company is not regularly reported, current category assignments can typically be  
17 tracked by tracing comments made in TPVG's quarterly conference calls (when TPVG  
18 management most often discloses the name of a Portfolio Company – *i.e.*, when its credit risk  
19 category – by default White (2) at initiation – is either upgraded or downgraded).

20           56. Each quarter, TPVG reports the fair value of both its loan and equity investments.  
21 According to its 2022 Form 10-K, TPVG "value[s] substantially all of [its] investments at fair  
22 value as determined in good faith by [TPVG's] Board pursuant to a consistent valuation policy in  
23 accordance with the provisions" of relevant Generally Accepted Accounting Principles (GAAP).  
24 For those investments for which a market price is not readily available – which was the case for  
25 all of TPVG's loan investments during the Class Period and the vast majority of TPVG's equity  
26 investments – TPVG represents that its board makes the determination "with the assistance of  
27 [TPA] and [at times] and independent valuation agents." On an annual basis, the "valuation for  
28

1 each portfolio investment” is “generally reviewed . . . by an independent third-party valuation firm  
 2 in accordance with [TPVG’s] valuation policy.”

3       57. TPVG’s 2022 Form 10-K further represents that “[w]ith respect to investments for  
 4 which market quotations are not readily available, the Board undertakes a multi-step valuation  
 5 process each quarter.” That process “begins with each [P]ortfolio [C]ompany or investment  
 6 receiving a proposed valuation by [TPA]” prepared by TPA’s internal valuation committee.  
 7 TPVG’s 10-K further represents that “[f]or at least 25% of the Portfolio Companies each quarter,  
 8 an independent third-party valuation firm will provide an additional valuation recommendation,”  
 9 and “[TPA] and the independent third-party valuation firms, if applicable, then present their  
 10 proposed valuations to [TPVG’s] Valuation Committee and Board, and the Board makes a fair  
 11 valuation determination for each portfolio investment that is to be fair valued.”

12       58. TPVG’s 2022 Form 10-K further represents that the valuations provided by TPA  
 13 and any independent third-party valuation firm(s) “incorporat[e] significant unobservable inputs,  
 14 such as discounted cash flow models and other similar valuations techniques,” and are based in  
 15 part on “assumptions about how market participants would price the asset or liability in question.”  
 16 TPVG’s 2022 Form 10-K further states that “such valuations, and particularly valuations of private  
 17 companies, are inherently uncertain” and “require significant management judgment or  
 18 estimation,” but its most recent Form 10-K identifies specific criteria used in making those  
 19 determinations:

20       The types of factors that our Board takes into account in determining the fair value  
 21 of our investments generally include, as appropriate, such factors as yield, maturity  
 22 and measures of credit quality, the enterprise value of the company, the nature and  
 23 realizable value of any collateral, the company’s ability to make payments and its  
 earnings and discounted cash flow, our assessment of the support of their venture  
 capital investors, the markets in which the company does business, comparisons to  
 similar publicly traded companies and other relevant factors.

24       59. TPVG and TPA (and hence Defendants Labe and Srivastana) had extensive access  
 25 to information from each Portfolio Company concerning each of these relevant valuation factors  
 26 under the relevant loan agreements, which not only required each Portfolio Company to make  
 27 regular and extensive disclosures of their private financial and business information, but which

1 also gave TPVG the power to obtain additional information through *ad hoc* information requests  
 2 and audit demands.

3       60. In short, at all relevant times, TPVG and Defendants Labe and Srivastana – through  
 4 regularly monthly reporting requirements and their additional powers to obtain information – had  
 5 exceptional access to, and insight into, each of the Portfolio Companies’ finances, business plans,  
 6 and any materially adverse events or contingencies that those Companies might face.

7 **II. THE UNDISCLOSED ADVERSE FACTS**

8       61. During the Class Period, Defendants repeatedly assured investors that they  
 9 maintained a high-quality portfolio of loans to the Portfolio Companies, reported consistently  
 10 strong net investment income, and each quarter identified only a very limited number (and dollar  
 11 value) of loans that needed to be “downgraded” under TPVG’s own loan quality classifications.

12       62. Unfortunately for investors, however, the condition of TPVG’s portfolio was far  
 13 less rosy than what Defendants described. To the contrary, by the start of the Class Period,  
 14 numerous components of TPVG’s portfolio had slid into a state of significant decay and were on  
 15 course to continue to spiral downwards to default, and the extent of that decay only became more  
 16 severe as the Class Period unfolded. And what was worse, even though in some cases TPVG may  
 17 have had the benefit of being a relatively senior lender, this was not always the case. With respect  
 18 to the loans in which TPVG was a junior creditor, in particular, TPVG would often eventually be  
 19 forced to either write down most (if not all) of those assets’ value, or to reduce their credit risk  
 20 categories to increasingly low levels reflecting a far higher risk profile than what investors had  
 21 previously understood to be appropriate. In at least one case, Defendants managed to forestall the  
 22 necessity of recognizing losses on TPVG portfolio loans by arranging to have another Portfolio  
 23 Company purchase and assume the debts in bankruptcy court. As a result, throughout the Class  
 24 Period, Defendants deceived and misled the investing public as to the truth about its portfolio’s  
 25 loan quality and the truth about TPVG’s actual skill in being able to select “high quality”  
 26 investment opportunities – and causing the price of TPVG common stock to trade at fraudulently  
 27 inflated prices throughout the Class Period.

28

1       63. As detailed in the following section, Plaintiffs' factual investigation to date has  
 2 identified numerous specific examples of Portfolio Company investments made by TPVG which,  
 3 unbeknownst to the public, had fallen into such a serious state of decay during the Class Period  
 4 that they needed to be (but were not) (a) downgraded in TPVG's quarterly disclosures of higher  
 5 risk loans; (b) written down in value for purposes of TPVG's quarterly financial reporting; or (c)  
 6 both. Although Plaintiffs' factual investigation is ongoing, the following are examples of soured  
 7 transactions whose material decay was concealed and hidden, in whole or in substantial part, from  
 8 investors during the Class Period.

9           **A. Medly Health, Inc.**

10       64. Portfolio Company Medly Health ("Medly") began as a series of pharmacies geared  
 11 towards specialized prescriptions and digital operations. Medly's last round of venture capital  
 12 equity funding, a Series B round that raised \$100 million, closed on July 14, 2020.

13       65. TPVG, TPPVC, and TPC entered into a growth capital loan agreement with Medly  
 14 on November 20, 2020. TPVG's portion of this initial loan deal was two \$5 million loans (each  
 15 with an interest rate of prime + 8.75% and with an End of Term ("EOT") payment due December  
 16 31, 2023). Although TPVG had repeatedly represented to its investors that most of its growth  
 17 capital loans were "senior secured," TPVG's initial loans totaling \$10 million were made expressly  
 18 subject to a subordination agreement which subordinated TPVG's loans to a preexisting \$20  
 19 million loan made to Medly by Silicon Valley Bank ("SVB").<sup>9</sup>

20       66. Moreover, at the time TriplePoint and TPVG made these loans, Medly was already  
 21 operating at a substantial monthly loss. As Medly's CEO explained in the context of Medly's  
 22 subsequent bankruptcy, "[t]he expenses associated with [Medly's] digital pharmacy, especially

---

23  
 24       9       Medly's obligations under the SVB Loan Agreement were secured by first priority liens on (a) the Debtors'  
 25 goods, accounts (including health-care receivables), equipment, inventory, contract rights or rights to payment of  
 26 money, leases, license agreements, franchise agreements, general intangibles, intellectual property, commercial tort  
 27 claims, documents, instruments (including any promissory notes), chattel paper (whether tangible or electronic), cash,  
 28 deposit accounts, certificates of deposit, fixtures, letters of credit rights (whether or not the letter of credit is evidenced  
                  by a writing), securities, and all other investment property, supporting obligations, and financial assets, whether now  
                  owned or hereafter acquired, wherever located; and all books relating to the foregoing, and any and all claims, rights  
                  and interests in any of the above and all substitutions for, additions, attachments, accessories, accessions and  
                  improvements to and replacements, products, proceeds and insurance proceeds of any or all of the foregoing, and (b)  
                  Medly's intellectual property.

1 those required for the IP systems build out and labor costs, grossly exceeded revenues generated  
 2 by the business,” and by August 2021 Medly’s digital pharmacy operations had been “los[ing] an  
 3 average of \$12-14 million ***each month*** for over a year” – *i.e.*, since at least August 2020 (three  
 4 months ***before*** TPVG made its initial \$10 million in loans).

5       67. Moreover, Medly’s cash flow problems only worsened when, in January 2022, it  
 6 acquired a second business line: namely, a chain of pharmacies operating under the name  
 7 “Pharmacा.” Pharmacा catered largely to individuals interested in whole-being health and  
 8 wellness (and emphasized vitamins, supplements and other products geared to helping customers  
 9 live a healthier lifestyle).

10       68. A former Medly employee, who was a Vice President on the engineering side of  
 11 the business, and who had been with the company for multiple years up until the month before it  
 12 filed for bankruptcy, provided additional details on Medly’s situation before and after the  
 13 Pharmacा acquisition. The former Medly employee explained that Medly’s CTO, Prasad Pola (to  
 14 whom he had reported at one point in time), told the former employee that the debt portion of the  
 15 \$100 million of Series B funding that Medly had raised<sup>10</sup> was supposed to be used specifically to  
 16 deliver on operations. As the former employee explained, Medly “had big overhead costs with  
 17 buying drugs first before getting reimbursed,” and was a “low margin” business which needed to  
 18 operate in high volume and have heavy accounts to pay vendors and suppliers. The ex-Medly  
 19 employee went on to explain that CTO Pola had told him that Medly “used that debt [from the  
 20 Series B round] to acquire Pharmacा and expand the footprint” of the business, even though the  
 21 debt was not supposed to be used for acquisitions, only operating costs. The former employee  
 22 recalled that the acquisition was settled by the beginning of 2022 leaving Medly “very thin on  
 23 extra money.” Although none of these circumstances would have been known to the investing  
 24 public, they would have all been known to Defendants given Defendants’ extensive access to  
 25 Medly’s internal business plans and financial information.

26

27

---

28       <sup>10</sup> Public sources confirm the amount of Medly’s Series B financing round (\$100 million) and that  
 the round closed in July 2020.

1       69.     Although Medly's cash drain continued – and was in fact exacerbated by what the  
2 former Medly employee described as a “poorly thought-out acquisition” of Pharmaca – such that  
3 Medly “never proved to be profitable,” TPVG not only continued to report its existing \$10 million  
4 in loans at essentially full face value<sup>11</sup> throughout 2021 and into the second half of 2022, but TPVG  
5 actually decided to loan an ***additional \$20 million*** to Medly on March 25, 2022 at an even lower  
6 interest rate of prime + 6.50%.

7       70.     Although Medly’s survival was by now clearly dependent on its ability to raise  
8 additional funding, in August 2022 (less than six months after TPVG’s latest \$20 million loan to  
9 it), Medly suffered another serious setback when a deal for it to receive an additional \$130 million  
10 in funding (consisting of \$100 million total in financing from MidCap Funding IV Trust and  
11 TriplePoint entities, to be accompanied by a follow-on \$30 million preferred equity funding) was  
12 upset by MidCap’s eleventh-hour decision to pull out, which caused the entire deal to collapse and  
13 the contemplated additional \$30 million funding round to fall through. As a result, Medly was left  
14 suddenly short \$130 million in funding it had expected to receive. It was also in August that, per  
15 Medly’s CEO in its bankruptcy filing, that “[Medly’s] senior management became aware of certain  
16 operational and accounting irregularities conducted by [Medly’s] original founders and certain  
17 other related individuals,” which it then reported to Medly’s board, which in turn then “terminated  
18 the members of the [Medly] founders group who were involved in the improper activities” and  
19 ousted the former CEO.

20        71. After this fiasco, which Defendants would have learned about in close to real time,  
21 TriplePoint entities including TPVG and other pre-existing Medly investors managed to quickly  
22 cobble together a further round of \$20 million in secured financing (of which TPVG provided  
23 \$4.286 million on August 29, 2022, at an interest rate of prime + 6.50%) to fund a restructuring  
24 plan proposed to TriplePoint by Medly.

<sup>26</sup> <sup>11</sup> Like the majority of TPVG's loans, its loans to Medly were at a floating interest rate (prime + 8.75% interest, in the  
27 case of the initial two loans). The fair value of TPVG's floating-rate loans can be expected to fluctuate slightly from  
28 quarter to quarter depending upon the prevailing interest rates. *De minimis* increases above or decreases below a  
floating-rate loan's baseline fair value are likely attributable to interest rate changes as opposed to a reflection of the  
loan's credit risk and/or collectability.

1       72. As of late August 2022, therefore, Medly was in dire straits. As Medley's new  
 2 CEO testified in the company's later bankruptcy proceedings: "[f]or three and a half weeks,  
 3 [Medly had been] unable to purchase drugs with which to fill prescriptions. Sales plummeted by  
 4 eighty percent (80%). With [Medly was] unable to disburse necessary medications, many  
 5 customers simply took their prescriptions elsewhere so they could be timely filled." As a result,  
 6 between early August and early November 2022, *Medly terminated just over half of its workforce*.  
 7 Indeed, on September 14, 2022, a class action was filed against Medly under the federal and New  
 8 York State WARN Acts (29 U.S.C. §2101 *et seq.* and N.Y. Labor Code §§921 *et seq.*, respectively)  
 9 on behalf of all former Medly employees based on Medly's failure to provide the required advance  
 10 notice for the mass layoffs that had occurred on August 4 and 31, 2022. And although Defendants  
 11 were aware of all this as it was unfolding (and knew, *e.g.*, that TPVG's own latest funding  
 12 contribution was effectively part of a desperate attempt at funding a *restructuring plan* for Medly),  
 13 in its Q1, 2Q, and Q3 2022 filings TPVG continued to effectively report its original \$30 million in  
 14 loans to Medly at close to their full face value, while valuing its new \$4.286 million August loan  
 15 in its Q3 2022 filings at \$4.030 million (for a barely perceptible reduction of roughly 5.8% on just  
 16 this one small loan).

17       73. The deliberately deceptive nature of Defendants' reporting for these loans is further  
 18 evidenced by the fact that, even though TPVG's 10-Q for Q3 2022 – the quarter ending September  
 19 30, 2022, which was filed on November 2, 2022 - indicated that Medly's loans were still accruing  
 20 interest, TPVG put Medly's loans on nonaccrual as of October 1, 2022, the day *after* the quarter it  
 21 was reporting ended. Doing so enabled Defendants to delay acknowledging the problems at Medly  
 22 to investors. Moreover, TPVG's Q3 2022 10-Q (filed November 2, 2022) had just a single  
 23 sentence on Medly in its discussion of recent portfolio company activity, which read: "On  
 24 November 1, 2022, the Company received preliminary information regarding certain recent  
 25 negative developments at portfolio company Medly Health Inc., which we believe could result in  
 26 a future credit rating downgrade of their outstanding loans." But this statement was, at a minimum,  
 27 materially misleading on its face, as the evidence generated in Medly's subsequent bankruptcy  
 28 shows that TPVG had learned of "recent negative developments" warranting a *significant*

1 downgrading (if not complete write-off) of the entire \$34.286 million in Medly loans *by August*  
 2 *2022 at the latest.* Similarly, Defendant Srivastava's comments at TPVG's November 2 earnings  
 3 conference call (which noted that Medly had been downgraded from a "satisfactory" category 2 to  
 4 a "performing below expectations" category 3 credit risk rating, and that the developments of  
 5 November 1 "*m[ight]*" result in a future downgrade of the Medly loans in the 4th quarter) were  
 6 also materially false and/or misleading. Moreover, they were calculated to further forestall the  
 7 disclosure of the truth about the Medly loans and TPVG's past history of materially overstating its  
 8 Portfolio Companies' actual creditworthiness.

9       74. Medly filed for bankruptcy on December 9, 2022. The first day bankruptcy filings  
 10 simply confirmed what Defendants already knew – namely that Medly was in desperate need of  
 11 cash and had "an urgent and immediate need for access to funds . . . to have sufficient liquidity to  
 12 operate [its] business and satisfy accruing administrative obligations pending the sale process and  
 13 ultimate outcome" of the bankruptcy, without which Medly "would not be able to continue [its]  
 14 business operations and would be forced to shut down and file" for a no-asset bankruptcy *under*  
 15 *Chapter 7.*

16       75. On December 12, 2022, TPVG filed an 8-K that disclosed Medly's bankruptcy as  
 17 well as the fact that it expected to (belatedly) downgrade all of its Medly loans from credit risk  
 18 category 3 (Yellow) to 5 (Red).

19       76. In its 10-K for FY 2022, which was filed in March 2023, TPVG recorded the full  
 20 amount of its pre-bankruptcy loans (\$34 million) as realized losses.

21           **B. The Pill Club**

22       77. The Pill Club was a telehealth medical service company prescribing and shipping  
 23 contraceptives. The entire process occurred virtually from the patient's perspective, but The Pill  
 24 Club also owned two nationally licensed pharmacies operating out of two physical pharmacy  
 25 locations which filled prescriptions and billed pharmacy insurance on behalf of patients.

26       78. By the time TPVG made a funding commitment to The Pill Club in 2021, the  
 27 company had been in trouble for years. For example, a *qui tam* action alleging serious misconduct  
 28

1 against The Pill Club and its affiliates had been filed in March 2019,<sup>12</sup> and The Pill Club had been  
 2 under criminal investigation by multiple authorities since December 2018. In the *qui tam* action,  
 3 the plaintiffs alleged that the Pill Club and its principals had engaged in a scheme since at least  
 4 May 2016 to enrich themselves and defraud California's Medicaid program (Medi-Cal) and  
 5 various private health care insurance providers in at least 37 other states of millions of dollars.  
 6 More specifically:

7 Relators allege, among other things, that since at least May 2016, Defendants have  
 8 engaged in a scheme to defraud millions of dollars from the California Medicaid  
 9 program, Medi-Cal, and private health care insurance providers in at least 38 states,  
 including California. . . .

10 To enrich themselves at the expense of Medi-Cal and private health care insurers,  
 11 Relators allege Defendants knowingly instructed nurse practitioners to diagnose  
 12 and write an unmanageable number of prescriptions and refills for patients where  
 13 those nurse practitioners: (1) had no supervising doctor; (2) had no supervising  
 14 doctor licensed in California; (3) had no way to contact a supervising doctor, if one  
 existed; (4) had no proper standardized procedures or protocols; (5) spent far less  
 time than required assessing, diagnosing and prescribing, and/or (6) if a supervising  
 doctor did exist, the nurse practitioners outnumbered the doctors so that the doctors  
 would have had to supervise more than four nurse practitioners at any given time.

15 79. After the *qui tam* action's filing, the California Department of Justice Department  
 16 of Medi-Cal Fraud and Elder Abuse ("DMFEA") and the California Department of Insurance  
 17 ("CDI") initiated even broader civil investigations into misconduct at The Pill Club, including for  
 18 violations of the Stark Act and other similar statutes prohibiting self-referrals; failures to meet  
 19 telemedicine requirements; inappropriate billing practices, including upcoding; providing  
 20 "worthless services of no medical value"; using unlicensed out-of-state personnel to treat  
 21 California patients; inadequate supervision of nursing staff; and billing for certain products without  
 22 patient knowledge. The Pill Club became aware of the scope of the respective sets of civil  
 23 investigations by no later than early February 2021, although the *qui tam* action was not unsealed  
 24 until later. The Pill Club became aware of the criminal investigations in April 2021.

25 80. In the final quarter of 2021, TPVG signed a term sheet that committed it to loan  
 26 The Pill Club up to \$20 million, though The Pill Club did not immediately draw on that funding.

---

27 <sup>12</sup> See *State of California ex rel. Happy Baumann v. The Pill Club Holdings, Inc.*, Case No. 34-2019-00253324  
 28 (Sacramento Cnty. Super. Ct.).

1 By the time The Pill Club *did* draw on its funding from TPVG in August 2022, (1) The Pill Club  
 2 had made presentations to the DMFEA on the issues under investigation in late 2021; (2) the  
 3 DMFEA had sent The Pill Club a 30-page document which outlined DMFEA's theories of liability,  
 4 supporting evidence, and significant damages; (3) the DMFEA, after determining that pre-  
 5 litigation settlement was unlikely, had informed The Pill Club in April 2022 of both the *qui tam*  
 6 action and of DMFEA's intent to intervene in it; and (4) the parties had tried to settle the claims at  
 7 a mediation in June 2022.

8       81.     Nonetheless, on August 5, 2022, TPVG funded a \$20 million loan to The Pill Club  
 9 at prime + 6.75% (5.25% EOT payment and maturing on August 31, 2024). Given the loan  
 10 agreement's terms (which almost certainly would have required The Pill Club to disclose "any  
 11 material litigation by or against You" at any point after it signed the term sheet, based on the  
 12 language in the Underground Enterprises loan agreement discussed above), TPVG would have  
 13 known of at least the pending civil investigations by this time, but it nonetheless proceeded with  
 14 the funding.

15       82.     Following a mediation in October 2022, the Pill Club reached a settlement in  
 16 principle with the DMFEA and the *qui tam* action was largely unsealed in January 2023. At the  
 17 same time, the DMFEA's, CDI's, and *qui tam* plaintiffs' claims against The Pill Club were  
 18 formally settled with the DMFEA receiving \$15 million<sup>13</sup> and the CDI receiving \$3.275 million.<sup>14</sup>  
 19 The DMFEA settlement was publicly announced by the California Attorney General on February  
 20 7, 2023.<sup>15</sup> These settlement amounts were on top of the \$13 million in legal fees The Pill Club  
 21 paid to its attorneys related to the *qui tam* action and investigations.

22       83.     According to a later bankruptcy declaration filed by The Pill Club's CEO, after  
 23 these settlements became public, "several key partners terminated their contracts" with The Pill  
 24

---

25       <sup>13</sup>       <https://oag.ca.gov/system/files/attachments/press-docs/TPC%20Fully%20Executed%20Settlement%20Agreement%20%281%29.pdf>.

26       <sup>14</sup>       <https://www.insurance.ca.gov/0250-insurers/0500-legal-info/upload/Pill-Club-Settlement-and-Release-Agreement.pdf>.

27       <sup>15</sup>       <https://oag.ca.gov/news/press-releases/attorney-general-bonta-announces-15-million-settlement-against-silicon-valley>.

1 Club, resulting in a projected 60% loss in revenue. Additionally, in March 2023, (1) a “key  
 2 partner” of The Pill Club served a dispute notice on The Pill Club that alleged that its misconduct  
 3 constituted a breach of contract that would result in more than \$50 million in damages; and (2)  
 4 The Pill Club received a Civil Investigative Demand from Michigan’s Attorney General relating  
 5 to its investigation of issues similar to those raised by the California authorities.

6       84. On April 20, 2023, The Pill Club filed for bankruptcy. The Pill Club’s CEO  
 7 admitted in her first day declaration that there was a “looming cloud of legal actions” (including  
 8 those described above) based on potential and/or existing investigations and litigations in other  
 9 states which could “cast a shadow over [The Pill Club’s] plans to expand into new business lines,  
 10 to obtain additional financing, or to engage in any strategic transactions in the future.” She added  
 11 that The Pill Club was “concerned that the valuation of their assets and their company m[ight] be  
 12 negatively impacted for years to come by this impending threat.”

13       85. Although TPVG would have been well aware of the sordid allegations concerning  
 14 The Pill Club and the likelihood – if not inevitability – of its bankruptcy from no later than August  
 15 2022 when it went ahead with its \$20 million loan to it, in its 10-K for the year ended December  
 16 31, 2022, TPVG continued to report the fair value of that loan at effectively its full face value, and  
 17 continued to do so in its financial statements as of the end of Q1 2023 (the quarter ended March  
 18 31, 2023).

19       86. In its May 3, 2023 Q1 2023 earnings call, Defendant Srivastava acknowledged The  
 20 Pill Club’s bankruptcy and described it as “an ongoing situation,” adding that “we expect more  
 21 developments to occur in the near term that could result in substantial or full recovery of our loan.”  
 22 This was an apparent reference to a stalking horse bidder<sup>16</sup> apparently put up by TriplePoint. The  
 23 stalking horse bidder’s only proffered “purchase price” was its assumption of all of The Pill Club’s  
 24 combined \$35.5 million in liabilities to the TriplePoint entities. At the end of the process, The Pill  
 25 Club’s “assets” (such as they were) were purchased by a special purpose entity controlled by  
 26

---

27       28       <sup>16</sup> A “stalking horse” bidder is the initial bidder in a bankruptcy with whom the debtor negotiates a purchase  
 agreement.

1 another TPVG Portfolio Company, Thirty Madison, Inc. (f/k/a NuRX), in exchange for the  
 2 assumption of The Pill Club’s liabilities to TriplePoint – including TPVG’s \$20 million loan to  
 3 the company – and a purchase price of \$300,000. Absent such an “inside deal” by what was, in  
 4 effect, a related party, it appears highly unlikely that TPVG would have been able to avoid writing  
 5 off most (if not all) of its \$20 million investment in The Pill Club – and the only reason TriplePoint  
 6 and TPVG were able to secure such a sweetheart deal appears to be that The Pill Club was a  
 7 patently undesirable entity. Despite being marketed to more than 70 companies, with 13 signing  
 8 NDAs, it received no qualified bids other than the TriplePoint proxy’s.

9           **C.     Hi.Q**

10       87.     Hi.Q Inc. is the parent company of Health IQ, which was in the life insurance  
 11 brokerage business (its business model was pitching lower rates to “health conscious individuals”) as of TPVG’s initial December 2018 \$13.25 million loan to it at an interest rate of 11.00%,  
 12 maturing June 30, 2023.

14       88.     Hi.Q completely changed its business in 2019, when it switched to selling Medicare  
 15 Advantage plans as a Medicare broker, using customers’ health records to recommend healthcare  
 16 plans tailored to their needs. While a dramatic change in a company’s business model is rarely a  
 17 good omen for a company’s prospects, TPVG did not discount or otherwise downgrade its loan to  
 18 Hi.Q for years, only doing so at the very end of the Class Period.

19       89.     Though Hi.Q was a self-described “AI platform,” it operated according to a fairly  
 20 straightforward and established business model as a Medicare broker. Like a typical third-party  
 21 Medicare broker, in order to obtain clients, Hi.Q had to cold-call consumers (“leads”) who were  
 22 identified to Hi.Q by external lead generators with which Hi.Q contracted.

23       90.     The telesales business is not without its pitfalls. Teleselling is significantly  
 24 circumscribed by the Telephone Consumer Protection Act (the “TCPA”), which, among other  
 25 things, prohibits telemarketers from making pre-recorded telemarketing calls and from calling  
 26 consumer phone numbers registered on the national Do Not Call (“DNC”) registry.

27

28

1       91. In November 2020, a TCPA class action was filed against Hi.Q in California (*Pettis*  
2       *v. Health IQ Insurance Services, Inc.*, Case No. 5:20-cv-08190 in N.D. Cal.),<sup>17</sup> alleging rampant  
3       violations of the TCPA (including the placement of pre-recorded telemarketing calls and calls to  
4       consumers on the DNC registry). Another TCPA class action was filed against Hi.Q in December  
5       2020 (*Johnson v. Health IQ Insurance Services, Inc.*, Case No. 1:20-cv-07522 in N.D. Ill.),<sup>18</sup> which  
6       alleged that Hi.Q made unsolicited calls to consumers, including after recipients had asked Hi.Q  
7       to cease contacting them.

8        92. Despite these early warning signals, less than two weeks after this second class  
9 action was filed, TPVG made a second loan to Hi.Q of \$6.868 million at an interest rate of prime  
10 + 7.50%, with a 1.00% EOT payment, maturing on August 31, 2025.

11       93. Two more TCPA class actions were brought against TPVG in June 2021: one in  
12 Oklahoma (*Tyner v. Hi.Q*, Case No. 5:21-cv-00608 in W.D. Okla.) and another in California (*Hoy*  
13 *v. Hi.Q*, Case No. 3:21-cv-04875 in N.D. Cal.),<sup>19</sup> and a fifth TCPA class action was filed in  
14 Pennsylvania in October 2021 (*Dobbs v. Health IQ Ins. Services, Inc.*, Case No. 5:21-cv-05276 in  
15 E.D. Pa.),<sup>20</sup> followed by a sixth action in February 2022 (*Norris v. Health IQ Ins.Services, Inc.*,  
16 Case No. 3:22-cv-01236 in N.D. Cal.)<sup>21</sup> and a seventh in March 2022 (*Marsh v. Health Ins.*  
17 *Services, Inc.*, Case No. 2:22-cv-00431 in D. Nev.). And in May 2022, yet another TCPA class  
18 action (the eighth up to that point) was filed against Hi.Q in Florida (*Taylor v. Hi.Q, Inc.*, Case  
19 No. 8:22-cv-01155 in M.D. Fla.).<sup>22</sup>

20        94. Moreover, as would come out in its later bankruptcy proceeding, Hi.Q was in  
21 enough distress in late 2021 that it apparently retained a restructuring firm – Drive Train LLC  
22 (“Drive Train”) – to help it try to reorganize its business for a fee of \$6.5 million (for which Drive

<sup>17</sup> The *Pettis* case was voluntarily dismissed with prejudice in April 2021, suggesting a settlement.

<sup>18</sup> The *Johnson* case settled in January 2021 and was subsequently dismissed with prejudice.

19 Both cases were still active at the time Hi.Q filed for bankruptcy in August 2023.

<sup>20</sup> The *Dobbs* case was ultimately compelled to arbitration in mid-2022.

<sup>21</sup> Norris settled in May 2022.

*Taylor* was settled in April 2023.

1 Train was given a first priority lien against payment). Defendants would almost certainly have  
 2 been aware of such a retention, because TriplePoint and TPVG would have needed to agree to  
 3 subordinate their preexisting secured debt for Drive Train to obtain a higher priority lien on its  
 4 debt.

5       95. Although Hi.Q was clearly struggling to operate a compliant telesales business –  
 6 and had agreed to spend a large sum to retain the services of a restructuring firm – TPVG  
 7 nonetheless continued to report its roughly \$20 million in loans to Hi.Q in 2021 at effectively their  
 8 full face value, and did so throughout the Class Period. TPVG even made a further \$5 million loan  
 9 to Hi.Q on May 6, 2022 at an interest rate of prime + 8.00%, with a 5.00% EOT payment, maturing  
 10 May 31, 2025.

11       96. By no later than late 2022 (and despite Drive Train’s apparent best efforts), Hi.Q  
 12 was struggling to keep its doors open. For example, according to a litigation declaration filed by  
 13 the CEO of a HiQ vendor, Hi.Q’s CEO commented at a meeting in or around late November 2022  
 14 that “that Hi.Q should increase the services it obtained since Hi.Q would ‘not be here’ by the time  
 15 invoices were due, or at a minimum, would not be paying of its vendors.”

16       97. Hi.Q was still litigating a number of the TCPA class actions around this time,  
 17 including the *Tyner* class action, where its motion for summary judgment was denied on December  
 18 7, 2022. Hi.Q began mass layoffs the very next day, with some sources suggesting Hi.Q had gone  
 19 from having nearly 1,000 employees to just 30 – not nearly enough for Hi.Q to continue any  
 20 semblance of operations. Former employees filed suits under the WARN Act against Hi.Q on  
 21 December 19 and 20, 2022, based on Hi.Q’s failure to provide sufficient notice before the mass  
 22 layoffs (*see Evans v. Hi.Q, Inc.*, Case No. 3:22-cv-01400, and *Quiles v. Hi.Q, Inc.*, Case No. 5:22-  
 23 cv-00669, both in M.D. Fla.).<sup>23</sup>

24       98. On December 9, the day after the mass layoffs began, Hi.Q’s CFO and CEO/co-  
 25 founder participated in a call with a vendor, Quote Velocity, LLC, where this senior Hi.Q official  
 26 was reported as saying that “his ‘hands were tied’” and “that Health IQ was not hitting its financial  
 27

---

28 <sup>23</sup> Both suits were sent to arbitration soon thereafter.

1 targets and the economics of the Medicare business were very challenging.” Later that month, the  
 2 same official purportedly wrote an email to Hi.Q’s investors updating them on the company’s  
 3 condition, and writing: “***I am very sorry that I lost your money.***”

4       99. On December 16, Quote Velocity sued Hi.Q for non-payment of nearly \$7 million  
 5 in unpaid invoices (*Quote Velocity, LLC v. Hi.Q, Inc.*, Case No. 22CV408665, Cal. Super., Santa  
 6 Clara Cty). It would be the first of many lawsuits which would be filed against Hi.Q by disgruntled  
 7 vendors in late 2022 and early 2023, as shown below:

- 8       a) December 19, 2022: *Call Criteria LLC v. Health IQ Insurance Services, Inc.*, Case No.  
       22VECV02459 in Los Angeles County.
- 9       b) December 22, 2022: *WeCall Media, Inc. v. Hi.Q, Inc.*, Case No. 22CV409028 in Santa  
       Clara County Superior Court, for more than \$2 million in unpaid invoices.
- 10      c) December 27, 2022: *Transparent BPO LLC v. Hi.Q, Inc.*, Case No. N22C-12-229 in  
       Delaware Superior Court, for more than \$500,000 in unpaid invoices.
- 11      d) January 11, 2023: *Assure Media LLC v. Hi.Q, Inc.*, Case No. 2023CA000238 in Florida  
       State Court, for nearly \$1 million in unpaid invoices.
- 12      e) January 12, 2023: *GlobalCom BPO Services, LLC v. Hi.Q, Inc.*, Case No. ATL-L-000065-  
       23 in New Jersey State Court, for more than \$400,000 in unpaid invoices.<sup>24</sup>
- 13      f) January 25, 2023: *CCI Enterprises DMCC v. Hi.Q, Inc.*, Case No. 1:23-cv-00090 in D.  
       Del., for more than \$600,000 in unpaid invoices.
- 14      g) February 3, 2023: *Innovative Employee Solutions Inc. v. Health IQ Inc.*, Case No. 37-2023-  
       00004945 in San Diego Superior Court.
- 15      h) February 7, 2023: *TalentCrowd LLC v. Health IQ Insurance Services, Inc.*, Case No.  
       23CV411126 in Santa Clara County Superior Court, for more than \$120,000 in unpaid  
       invoices.

16       100. Additionally, the same day the *WeCall Media* lawsuit was filed on December 22,  
 17 2022, Quote Velocity filed an *ex parte* application for a writ of attachment of Hi.Q’s assets based  
 18 on Hi.Q’s alleged inability to pay a judgment.

19       101. TPVG and Defendants Labe and Srivastava were undoubtedly aware of Hi.Q’s  
 20 precarious financial situation long before the December layoffs and lawsuits began given their  
 21 access to Hi.Q’s financial and other inside information under the terms of TPVG’s loan agreements  
 22

---

23  
 24       24 The case was dismissed on jurisdictional grounds and refiled in Delaware on April 3, 2023. See *GlobalCom*  
 25 *BPO Services, LLC v. HealthIQ*, Case No. N23C-04-017 in Delaware Superior Court.

1 with the company. Any suggestion that Defendants were not aware at the time of TPVG's Form  
 2 10-K was filed on March 1, 2023 of Hi.Q's mounting problems is dispelled by a review of the  
 3 docket in the *Quote Velocity* matter: Silicon Valley Bank, which had appeared in the *Quote*  
 4 *Velocity* matter to try and quash the writ of attachment filed by the plaintiff, filed a declaration  
 5 executed by TriplePoint Capital's CEO, Kevin Thorne, on February 7, 2023 in support of its  
 6 motion to quash.

7       102. Even though Hi.Q had dismissed nearly its entire workforce, Hi.Q's CEO was  
 8 telling vendors it couldn't pay its invoices, and vendor lawsuits were beginning to mount, TPVG  
 9 reported the fair value of its \$25.117 million in loans to Hi.Q as \$22.598 million as of December  
 10 31, 2022 in its FY 2022 Form 10-K, which it filed on March 1, 2023. But this reduction in value  
 11 was essentially de minimis, and even as of the date of that filing TPVG had not put its Hi.Q's loans  
 12 on nonaccrual.

13       103. In the March 1, 2023 earnings call for 4Q4 2022, Srivastava announced that Hi.Q  
 14 was being downgraded from its "performing at expectations" category 2 credit risk to a category  
 15 3 credit risk (assigned to companies "[p]erforming generally below expectations," but with an  
 16 "[a]dequate financial or enterprise profile, value or coverage"). Srivastava stated that the  
 17 downgrade was "due to developments in [Hi.Q's] strategic financing processes" and not (as was  
 18 actually the case) the effective cessation of Hi.Q as a going concern.

19       104. After that earnings call, on March 8, 2023, a ninth (at least) TCPA class action was  
 20 filed against Hi.Q in California (*TalentCrowd LLC v. Health IQ Insurance Services, Inc.*, Case  
 21 No. 23CV411126, Cal Super., Santa Clara County). And at least an additional seven lawsuits were  
 22 filed after that point by vendors on which Hi.Q had defaulted:

- 23       a) March 16, 2023: *Propio LS LLC v. Hi.Q, Inc.*, Case No. 23CV01406 in Kansas State Court.
- 24       b) March 20, 2023: *Osceola Lead Generation Holdings, LLC v. Hi.Q, Inc.*, Case No.  
           23CV413255 in Santa Clara Superior Court, for more than \$280,000 in unpaid invoices.
- 25       c) March 28, 2023: *Barrington Media Group, LLC v. Hi.Q, Inc.*, Case No.  
           AANCV236050661S in Connecticut State Court, for more than \$1 million in unpaid  
           invoices.
- 26       d) March 30, 2023: *AllianceOne Receivables Management, Inc. v. Hi.Q, Inc.*, Case No.  
           23STCV07069 in Los Angeles County Superior Court, for nearly \$250,000 in unpaid  
           invoices.

- 1       e) April 18, 2023: *Six Eleven Global Services and Solutions Inc. v. Hi.Q Inc.*, Case No.  
2           23CV414738 in Santa Clara County Superior Court, for nearly \$350,000 in unpaid  
3           invoices.
- 3       f) April 24, 2023: *Nexton Advanced Engineering Services LLC v. Health IQ, Inc.*, Case No.  
4           23CV415070 in Santa Clara County Superior Court, for more than \$200,000 in unpaid  
5           invoices.
- 5       g) April 25, 2023: *My Health Angel LLC v. Hi.Q, Inc.*, Case No. 23CV415886, Santa Clara  
6           County Superior Court.

6           105. Yet even in its 10-Q for Q1 2023 (the quarter ended March 31, 2023), which was  
7           filed on May 3, 2023, TPVG reported the fair value of its \$25.117 million in loans to Hi.Q as  
8           \$17.948 million – only a 28.5% discount. It did, however, put Hi.Q’s loans on nonaccrual as of  
9           March 31, 2023.

10          106. On the earnings call for that quarter, Defendants Srivastava finally announced that  
11           Hi.Q was being downgraded from category 3 to category 4 (“Needs close attention due to  
12           performance materially below expectations, weak financial and/or enterprise profile, concern  
13           regarding additional capital or exit equivalent.”) and that it was “continu[ing] to navigate through  
14           challenges in our sectors and businesses as well as developments in our strategic financing  
15           processes.” In short, even when disclosing the existence of “challenges” at HiQ, Defendants could  
16           not help but continue to try to conceal the true nature and extent of its gravely serious problems.

17          107. Since then, the lawsuits against Hi.Q have only continued to roll in from Hi.Q’s  
18           unpaid vendors, including:

- 19           a) May 9, 2023: *Qualstaff Resources v. Health IQ, Inc.*, Case No. 23CV416011 in Santa Clara  
20           County Superior Court, for just under \$30,000 in unpaid invoices.
- 21           b) May 17, 2023: *EBUS Inc. v. Hi.Q, Inc.*, Case No. 23CV416415 in Santa Clara County  
22           Superior Court, for roughly \$470,000 in unpaid invoices.
- 23           c) May 18, 2023: *Creditors Adjustment Bureau, Inc. v. Health IQ Insurance Services, Inc.*,  
24           Case No. CGC-23-606600 in San Francisco County Superior Court, for approximately  
25           \$600,000 in unpaid invoices.
- 26           d) July 19, 2023: *CDW Direct, LLC v. Health IQ Insurance Services, Inc.*, Case No.  
27           2023L007163 in Cook County, Illinois, for more than \$1.1 million in unpaid invoices.

28          108. On August 30, 2023, Hi.Q filed for a no-asset bankruptcy under Chapter 7. In its  
29           petition, Hi.Q estimated that it had assets between \$1 and \$10 million and ***liabilities between \$100***  
30           ***and \$500 million.*** Its bankruptcy filings also revealed that Hi.Q was making staggeringly little

1 money while racking up its enormous debts. Indeed, in all of 2021, Hi.Q’s gross revenue was  
 2 apparently only \$7,490,240.19, and in 2022 its gross revenue was apparently only \$8,642,621.88.  
 3 As of its bankruptcy filing, it reported its gross revenue for 2023 through August as only  
 4 \$4,745,950.24, and it reported its assets on hand as only \$1,345,376.96. The bankruptcy filings  
 5 also revealed that – once again – TPVG was not even a “senior secured” lender, and had at best a  
 6 second priority lien behind a \$250,000 bank letter of credit and a first-priority lien of \$6.5 million  
 7 on a loan incurred in December 2021, secured by “[a]ll assets of the entity,” and held by DASIR,  
 8 LLC (*i.e.*, Drive Train). It also appears based on filings in the bankruptcy that SVB was able to  
 9 repossess some of Hi.Q’s intellectual property (valued at \$4.5 million) that was pledged to secure  
 10 its loans ahead of TPVG.<sup>25</sup> In its 10-Q for 3Q 2023, filed on November 1, 2023, TPVG finally  
 11 wrote off its loans to Hi.Q in full.

12           **D. VanMoof**

13       109. VanMoof is a global bicycle manufacturer headquartered in the Netherlands and  
 14 founded in 2005 in Amsterdam by two brothers. VanMoof started with a line of traditional bikes  
 15 before later moving exclusively to e-bikes. VanMoof has teams in more than 20 cities worldwide,  
 16 including New York, Berlin, Taipei, Paris and London.

17       110. TPVG made its first investment in VanMoof B.V., the parent company, in February  
 18 2021: a \$8.654 million loan at a fixed 9.00% interest rate, 3.50% EOT payment, maturing January  
 19 31, 2025, the fair value of which it reported as \$8.155 million in its Q1 2021 10-Q. TPVG made  
 20 a second investment in May 2021: a \$4.37 million loan, 9.00% interest rate, 3.50% EOT payment,  
 21 maturing May 31, 2025). TPVG reported the fair value of the combined \$13.024 million loans as  
 22 \$12.426 million as of 2Q 2021, after which, in January 2022, TPVG made a third loan to VanMoof  
 23 for \$2.011 million on the same terms.

24

25

---

26       25       The board resolutions included in the bankruptcy filing indicate that another creditor, Leadenhall, was “in  
 27 the process of acquiring the loans made by Silicon Valley Bank (the ‘SVB Loan’) to [Hi.Q] and its subsidiaries in  
 28 order to realize on the collateral securing the SVB Loan,” which may be why the SVB loan was not listed as a liability.  
 And Leadenhall, though not a direct creditor, appears to have had a security interest in one of Hi.Q’s subsidiary’s  
 receivables. In sum, TriplePoint and TPVG were apparently fourth in line behind more senior HiQ lenders.

1           111. While VanMoof bikes have received a number of design awards, its bikes have also  
 2 suffered from known defects and long waits for repairs (VanMoof uses only its own parts, so all  
 3 repairs must be made at VanMoof’s own bicycle repair shops). Even with the boom in e-bike sales  
 4 occasioned by the COVID-19 pandemic, VanMoof never became close to being profitable. The  
 5 company’s most recent financial statements (which were for the year ending December 31, 2021,  
 6 and which were first filed in the Netherlands in January 2023) (the “2021 VanMoof Annual  
 7 Report”) show that VanMoof had net losses of €46.9 million in 2020 and €77.8 million in 2021,  
 8 with the net losses projected for 2022 at roughly the same level as recorded in 2021. In other  
 9 words, throughout the Class Period and even before, VanMoof wasn’t just unprofitable – it was  
 10 losing a staggering amount of money annually.

11           112. As Defendants knew or recklessly disregarded, VanMoof stayed afloat only  
 12 through raising increasing amounts of money through debt and equity financings. TriplePoint  
 13 affiliates provided a substantial amount of VanMoof’s debt financing, making an aggregate loan  
 14 commitment of €35 million to VanMoof on February 1, 2021.<sup>26</sup> While VanMoof raised enough  
 15 total money in 2021 (€104.2 million) to cover its roughly €77.8 million in losses, the same was  
 16 not true for 2022, when it was only able to raise €42.4 million (or €30 million less than its 2022  
 17 operating losses). In an update prefacing the 2021 VanMoof Annual Report (which was filed in  
 18 January 2023), VanMoof’s co-founders acknowledged:

19           Because of the losses in the past and the forecasted negative cash flows, the  
 20 uncertainty in obtaining external funding and the uncertainty in reaching the  
 21 forecasted revenues and cost of sales, there remains an uncertainty that may cast  
 22 doubt upon ***the Company’s ability to continue as a going concern through Q1 2023*** and therefore whether the Company will realize its assets and settle its  
 23 liabilities in the ordinary course of business at the amounts recorded in the financial  
 24 statements.

25           113. TPVG would have known as much well before the 2021 VanMoof Annual Report  
 26 was filed, because TPVG would have been intimately familiar with VanMoof’s financial condition  
 27 at all relevant times as a result of the information VanMoof was required to provide to TriplePoint  
 28

---

<sup>26</sup> VanMoof drew on this loan commitment in increments on February 1, 2021 (€20 million), in May 2021 (€10 million), and in early 2022 (€5 million), with the draw dates generally corresponding to the funding dates TPVG reported in its SEC filings as the dates when TPVG funded its pieces of the broader TriplePoint commitment.

1 under TriplePoint’s standard loan agreements, including in the form of financial statements. Yet,  
 2 even as the deterioration in VanMoof’s financial condition was accelerating in the second half of  
 3 2022 – to the point that it was asking its suppliers to defer payment –TriplePoint entities lent  
 4 VanMoof an additional €10.5 million in an effort to forestall total disaster.<sup>27</sup> As VanMoof’s  
 5 bankruptcy trustee later acknowledged, however, this emergency funding only “allowed  
 6 [VanMoof] to address its cash flow problems for a short period of time,” and it was “clear [at that  
 7 time] that additional financing would be needed to bridge the gap between [VanMoof’s] liabilities  
 8 and revenue.”

9       114. On January 22, 2023, the Dutch publication *Het Financieele Dagblad* (“HFD”)  
 10 published an article referencing some of VanMoof’s financial woes, and reporting some of what  
 11 TriplePoint and TPVG undoubtedly already knew –including that VanMoof’s accountant had  
 12 refused to sign the company’s preliminary 2022 financial statements because of “material  
 13 uncertainty” about VanMoof’s ability to secure the additional financing needed for it to continue,  
 14 and that VanMoof had asked its suppliers to agree to deferred payment of their invoices until it  
 15 obtained new financing.

16       115. Yet even at this late date, rather than coming “clean” as to VanMoof’s rapidly  
 17 declining financial condition and imminent risk of collapse, TPVG instead made four additional  
 18 “growth capital loans” totaling roughly \$4 million to VanMoof in the first quarter of 2023. And  
 19 on the March 1, 2023 earnings call to discuss TPVG’s 4Q 2022 results, which took place shortly  
 20 after it made these additional loans to VanMoof, TPVG disclosed only that “VanMoof, an e-bike  
 21 company with a principal balance of \$19 million” had been downgraded from a category 2 credit  
 22 risk to a category 3 credit risk.

23       116. At all material times during the Class Period, however, Defendants knew or  
 24 reckless disregarded that VanMoof had lost, and was continuing to lose, enormous amount of  
 25 money; and Defendants certainly knew by no later than the fall of 2022 that (1) VanMoof had run  
 26

---

27       27 Public filings in VanMoof’s bankruptcy indicate TPVG acted as collateral agent on this financing, and TPVG’s  
 28 SEC filings indicate that TPVG itself lent roughly \$3.750 million of this amount on November 1 in the form of two  
 revolver loans (at Prime + 4.75%, maturing on October 31, 2023) of \$1.875 million.

1 out of money; (2) it had only been saved from bankruptcy by TriplePoint’s provision of emergency  
 2 funding; (3) this emergency funding was not a long-term fix, but merely a stopgap measure; and  
 3 (4) VanMoof remained in desperate need of “new investments and thus a structural solution,” as  
 4 its bankruptcy trustee would later confirm. Accordingly, even Defendant Srivastava’s belated  
 5 disclosure of “some” credit problems at VanMoof in conjunction with a modest credit category  
 6 downgrade for the VanMoof loans was itself further evidence of Defendants’ evasions and intent  
 7 to conceal the nature and extent of the truth about TPVG’s problem loans to VanMoof until further  
 8 concealment simply became impossible (i.e., until later in 2023 after VanMoof had filed for  
 9 bankruptcy).

10       117. Accordingly, it was not until May 2, 2023, when The Bear Cave published its  
 11 report, that TPVG investors finally began to get a more accurate sense of the dire extent of the  
 12 problems at VanMoof, alongside a sense of Defendants’ past pattern (as further discussed  
 13 elsewhere herein) of consistently over-hyping the condition of TPVG’s purportedly “high quality”  
 14 loan portfolio and concealing the nature and extent of the areas of significant decay in its portfolio  
 15 loans.

16       118. Thereafter, on or around July 17, 2023, VanMoof B.V. filed for bankruptcy in the  
 17 Netherlands.<sup>28</sup> As of that filing, VanMoof owed roughly €77.9 million to TriplePoint, of which  
 18 approximately \$23 million were direct loans made by TPVG itself. In its 2Q 2023 Form 10-Q  
 19 (filed August 2, 2023), TPVG finally marked down the value of the VanMoof loans dramatically,  
 20 giving them a fair value of only about \$5.5 million. On the earnings call held later that day,  
 21 Defendant Srivastava described VanMoof’s bankruptcy as “a particularly surprising and  
 22 disappointing outcome” – which itself was a false and misleading statement, given that (as  
 23 VanMoof’s own financial statements confirm) there were serious questions about VanMoof’s  
 24 “ability to continue as a going concern through Q1 2023” in January 2023 at the absolute latest,  
 25 and TPVG’s active role in the desperate efforts to save VanMoof’s business in late 2022 and early

---

26  
 27  
 28       <sup>28</sup> Separately, on August 18, 2023, VanMoof B.V. filed a bankruptcy petition in the United States asking the  
 bankruptcy court to recognize the foreign bankruptcy under Chapter 15 of the Bankruptcy Code.

1 2023 would have given Defendants an even greater understanding of just how grave VanMoof's  
 2 situation was.

3       **E. RenoRun**

4       119. Like VanMoof, RenoRun also wound up in liquidation proceedings. Unlike  
 5 VanMoof, TPVG was able to recoup the principal amount of the money it loaned to RenoRun,  
 6 though it still lost out on the future interest payments, potential EOT payments and potentially  
 7 valuable equity kickers. As such, RenoRun serves as another example of TPVG's investment in  
 8 weak and unstable (rather than "quality" and "compelling") venture growth stage companies.

9       120. RenoRun was a Canadian startup that created an e-commerce marketplace for the  
 10 delivery of building materials to construction sites. The company delivered building materials like  
 11 lumber, drywall, hardware, doors, and paint from local hardware stores and its own network of  
 12 warehouses to residential construction job sites, offering delivery in as short a time as two hours.

13       121. TPVG made a growth capital loan of \$2.25 million (at prime + 10.50%, 8.25% EOT  
 14 payment, maturing December 31, 2025) to RenoRun on December 30, 2021. That same day,  
 15 RenoRun also issued a \$625,000 convertible note to TPVG (Prime + 4.00% interest rate, 7.25%  
 16 floor, maturing December 30, 2025).

17       122. As reported by BetaKit, a Canadian news outlet covering startup news and tech  
 18 innovation, after receiving this loan RenoRun continued its efforts to expand its operations across  
 19 North America until it hit "roadblocks" in 2022. Those roadblocks began in the second quarter of  
 20 2022, by which point RenoRun was "a quarter and a half behind its planned unit economic  
 21 improvements despite pulling in higher-than-expected revenue," per BetaKit. Unit economics are  
 22 the revenues and costs associated with each unit of a business (e.g., a customer, product, or  
 23 service).

24       123. Having fallen behind its targets, RenoRun decided to lay off 70 of its 600  
 25 employees, or roughly 12% of its workforce, across all of its departments in August 2022. At the  
 26 same time, RenoRun was struggling to pay its vendors, as reflected by a lawsuit filed by one vendor  
 27 that accused RenoRun of failing to pay \$122,473 owed for work performed over the course of  
 28 2022. See OneMarket, LLC v. RenoRun US, Inc., Case No. 2023L000034 (Ill. Cir. Ct., Cook

1 Cnty. Jan. 3, 2023). Moreover, the first round of layoffs proved insufficient, causing RenoRun to  
 2 conduct a second, and far larger layoff in October 2022 – this time laying off 210 employees (43%  
 3 of its remaining staff) across the company, and including several company executives. Moreover,  
 4 in a letter to its employees, RenoRun admitted that “the business climate we are operating in has  
 5 fundamentally changed,” and that “while our last reduction in force was necessary, it was not  
 6 sufficient in reducing the cost structure to the extent needed,” resulting in the additional layoffs.

7       124. BetaKit also reported that to stay afloat, RenoRun’s board decided it needed to raise  
 8 external bridge financing but scrapped that plan after one of RenoRun’s primary investors, Tiger  
 9 Global, decided not to invest. Three later attempts to raise bridge financing fell through due to  
 10 disagreements among RenoRun’s existing investors,<sup>29</sup> and representatives of two of those  
 11 investors (Inovia Capital and Sozo Ventures), subsequently resigned from RenoRun’s board in  
 12 January 2023.

13       125. Once it became clear that “RenoRun’s investors were not going to step up,” per  
 14 BetaKit, the company “made its biggest round of layoffs to date.” In February 2023 RenoRun fired  
 15 the majority of its remaining (and already much depleted) staff, leaving it with just 144 employees.  
 16 And as Betakit further reported:

17       Former employees that spoke with BetaKit expressed concerns that RenoRun  
 18 would file for insolvency. They noted that in a town hall announcing the latest round  
 19 of cuts, the impression was that RenoRun might need to file for insolvency and  
 there was talk of bringing in an outside accounting firm to handle the company’s  
 financials.

20       126. Although TPVG would have again had access to and reviewed ample information  
 21 about RenoRun’s deteriorating condition and materially declining financial performance  
 22 beginning no later than mid-2022, throughout the Class Period TPVG consistently reported the  
 23 RenoRun loan and convertible at effectively face value.

24       127. However, on March 27, 2023, after its attempts to acquire another startup or be  
 25 acquired by a long-time industry partner had failed, RenoRun filed a notice of its intention to try  
 26 to restructure the company under Canada’s Bankruptcy and Insolvency Act. Per BetaKit, filings  
 27

---

28 <sup>29</sup> Though TriplePoint was an existing investor, it is unclear whether TriplePoint was party to these negotiations.

1 in the Canadian bankruptcy indicated that RenoRun owed approximately \$55 million to its  
 2 creditors. By May 1, RenoRun had shut down its operations, but it was not until the publication  
 3 of The Bear Cave report on May 2, 2023, that TPVG investors were warned that RenoRun was yet  
 4 another example of a TPVG loan to an entity of dubious quality.

5       128. In its 10-Q for Q1 2023, filed May 3, 2023, TPVG continued to value its \$2.875  
 6 million investment in RenoRun at effectively face value, but for the first time – and belatedly –  
 7 disclosed on its earnings call later that day that TPVG was downgrading RenoRun from a category  
 8 2 (White) to category 3 (Yellow).

9       129. In its 10-Q for Q2 2023 filed on August 2, 2023, TPVG put RenoRun's loan on  
 10 nonaccrual, and the \$625,000 convertible note no longer appeared on its books. In the 10-Q for  
 11 Q3 2023, Defendant Srivastava also reported that TPVG had received \$1.9 million from the  
 12 liquidation of RenoRun, and that it expected to recover the remaining \$400,000 owed in 2024.

13       130. Though RenoRun's bankruptcy did not result in a total loss for TPVG, TPVG's  
 14 failure to downgrade the credit risk categorization of its RenoRun loan at any point during the  
 15 Class Period – and the fact that it only downgraded RenoRun's credit risk category *after* the  
 16 Portfolio Company had initiated insolvency proceedings in Canada – is further evidence of (a)  
 17 Defendants' reckless disregard for accurately reporting on the true quality and condition of its  
 18 investment portfolio, and of the fraudulently misleading nature of its repeated assurances  
 19 concerning the purported "high quality" of the companies it invested in; and (b) Defendants'  
 20 pattern of failing to timely downgrade portfolio loans until events (like a public bankruptcy filing)  
 21 made it effectively impossible for even the Defendants to come up with any remotely credible  
 22 pretext to justify inaction. Even when forced to act, Defendants typically took the minimum  
 23 possible action that could be pretextually justified.

24           **F. Capsule**

25       131. Capsule is an online pharmacy startup based in New York that promises speedy  
 26 prescription-drug deliveries to its customers. TPVG made a growth capital loan of \$15 million  
 27 (Prime+7.75%, 13.00% EOT payment, maturing December 31, 2024) to Capsule on December 30,  
 28 2020. Though Capsule continues to operate, since no later than the summer of 2022 there have

1 been serious questions about its profitability and long-term sustainability, none of which were  
 2 reflected in TPVG's Class Period statements.

3       132. Some of Capsule's problems stemmed from a major data breach resulting from a  
 4 cyberattack in the spring of 2022. On May 27, 2022, Capsule began notifying as many as 27,486  
 5 customers whose private information had been comprised, and by June 2022 it had been hit with  
 6 a class action alleging negligence and breach of contract, among other claims, related to the breach.  
 7 *See Hamm v. Capsule Corp.*, Case No. 1:22-cv-05435 (S.D.N.Y.).<sup>30</sup> A second data breach class  
 8 action was filed against it on August 25, 2022 (*J.L. v. Capsule Corp.*, Case No. 1:22-cv-07276 in  
 9 S.D.N.Y.).<sup>31</sup>

10       133. Capsule was also the subject of critical findings published by *The Information*, a  
 11 technology industry-focused publication, that appeared on April 19, 2023, and which in turn, was  
 12 referenced in the much more widely circulated Bear Cave report discussed in the "Truth Begins to  
 13 Emerge" section below. As first reported in *The Information*, in August 2022 "Capsule customers  
 14 in the city began experiencing dayslong delays in the delivery of medicines that in some cases  
 15 were critical to their health." These problems resulted from Capsule's shift from a staffed facility  
 16 in Manhattan to an automated facility in Harlem to fill its New York customers' prescriptions.  
 17 Although the shift was meant to cut costs, it proved to be a disaster. Per *The Information*:

18           [C]omplaints began pouring into online review sites about the pharmacy's service  
 19 in New York as delays on customer orders mounted. "We're imploding and creating  
 20 a mess with multiple failures on the same orders," a Capsule executive wrote in late  
 21 September in an internal Slack channel devoted to the situation. While the  
 22 automation project eventually helped reduce Capsule's costs for delivering orders  
 23 in New York, as of early this year [2023] those results were far short of its goals,  
 24 according to former employees and internal documents viewed by *The Information*.

25       134. To make matters worse, during the third quarter of 2022 Capsule was also "facing  
 26 a cash crunch" as "the fundraising environment for money-losing startups had soured," and  
 27 Capsule's on-demand delivery competitors like CVS, Walgreens, and Amazon had "intensified  
 28 their efforts to become bigger players in the home delivery of medications." In the months before

---

27       <sup>30</sup> The *Hamm* case was sent to arbitration on September 26, 2022.

28       <sup>31</sup> The *J.L.* plaintiff stipulated to binding arbitration in November 2022.

1     *The Information* exposé was distributed to its subscribers, Capsule had “laid off 15% of staff,  
 2 reduced operations in some cities, and shut down its service in at least two markets, Las Vegas and  
 3 Pittsburgh, according to five current and former employees.” Per *The Information*, “[t]he cuts  
 4 were motivated by investors, who took issue with Capsule’s high monthly cash burn—**between**  
 5 **\$10 million and \$25 million a month** throughout 2022” and “the company was seeking new  
 6 funding late last year, according to three people familiar with the matter.”

7         135. In the face of these serious allegations, throughout the Class Period, TPVG’s  
 8 valuation of its \$15 million loan remained at or above its face value, and was never downgraded  
 9 in category. The Capsule loan nonetheless raises serious questions as to the accuracy of  
 10 Defendants’ repeated characterizations of the TPVG loan portfolio’s purportedly “high” credit  
 11 quality.

12              **G. Good Eggs**

13         136. Good Eggs is a startup delivering fresh produce and other groceries to consumers.  
 14 TPVG made its first loan to Good Eggs, for \$6 million (Prime + 6.00% interest rate, 7.75% EOT  
 15 payment, maturing August 31, 2025), on August 12, 2021. It made a second loan of \$7 million  
 16 (Prime + 5.25% interest rate, 6.00% EOT payment, maturing May 31, 2025) to Good Eggs on May  
 17 26, 2022. As part of the earlier 2021 loan agreement, TPVG also acquired 1,072,903 shares of  
 18 Good Eggs’ preferred stock for \$401,000.

19         137. In 2022, according to a later article published in *The Information*, Good Eggs hired  
 20 an investment bank to sell the company to a third party. However, “no deal emerged other than  
 21 an offer by a special purpose acquisition company to take it public,” at which point the company  
 22 was “out of other options.” Good Eggs’ failure to find a suitor may have been due, in part (as  
 23 reported by *The Information*), to Good Eggs’ revenue falling by 18% in 2022, down to \$86 million  
 24 in 2022 from \$106 million in 2021.

25         138. Ultimately, Good Eggs’ need for new financing was so dire that, after failing to  
 26 find a buyer in 2022, it resorted to raising \$7 million in equity in early 2023 based on a pre-  
 27 investment company valuation of just \$15 million – which reflected a stunning **94%** devaluation  
 28 of the business from late 2020, when Good Eggs had raised \$60 million in equity based on a pre-

1 investment valuation of \$270 million. Moreover, the new financing came in the form of a “cram-  
 2 down or pay-to-play deal” that effectively wiped out earlier investors’ stakes. (It did so by giving  
 3 the new equity investors liquidation preferences over earlier equity investors, such that if Good  
 4 Eggs’ assets are ever liquidated, the new investors will receive twice the amount of their  
 5 investment before the old shareholders can divide up the remainder, if any). Although the writing  
 6 had already long been on the wall, TPVG had valued its preferred stock in Good Eggs at the  
 7 (ridiculous) value of \$515,000 as of the end of Q3 2022. TPVG only marked down the value of  
 8 its equity holdings in Good Eggs (to a much more reasonable valuation of \$32,000) in its 2022  
 9 Form 10-K, which it filed on March 1, 2023.

10       139. TPVG’s loans to Good Eggs were not immune to the company’s woes. *The*  
 11 *Information* reported that Good Eggs had “\$28 million in debt, including from Silicon Valley Bank  
 12 and TriplePoint Capital,” but that in early 2023 it was able to strike a deal with its lenders that  
 13 “allow[ed] it to not make principal payments for the next 18 months and [which] lower[ed] its  
 14 interest payments more than 40%.” That arrangement was ultimately reflected in TPVG’s 10-Q  
 15 for Q1 2023, which showed that interest rates for its two loans to the Portfolio Company (which  
 16 had previously been prime + 6.00% and prime + 5.25%) had both been reset to Prime + only  
 17 **0.50%**.

18       140. In sum, despite Good Eggs’ deteriorating financial performance and desperate need  
 19 for more cash, and despite its equity valuation having fallen to only about \$15 million as early as  
 20 January 2023 compared to its total debt of \$28 million – which implied that TPVG (as holder of a  
 21 little less than half this debt) would only get about 50 cents on the dollar in a sale or liquidation of  
 22 the business – TPVG continued to value its \$13 million in Good Eggs loans effectively at the face  
 23 value of their outstanding principal throughout the Class Period. Accordingly, it was not until the  
 24 publication of The Bear Cave report on May 2, 2023 (which warned TPVG investors of Good  
 25 Eggs’ recent devaluation and continuing cash burn problems) that investors began to appreciate  
 26 that Good Eggs was also a troubled TPVG borrower, and another example of how Defendants had  
 27 repeatedly misled the market as to the “high quality” of its loan portfolio.

28

1           **H. Underground Enterprises**

2           141. Underground Enterprises, Inc. d/b/a Underground Cellar, provided membership to  
 3 an online wine marketplace for discovering and buying premium wine that randomly rewarded  
 4 customers with free upgrades to rare and private-stash bottles from prestigious wineries. A  
 5 separate company, Pheno Wine Company, Inc. (together with Underground Enterprises,  
 6 “Underground”), facilitated the purchase and storage of wine by Underground’s retail customers.  
 7 Underground would store consumers’ wine until consumers were ready to use their stored bottles,  
 8 at which point Underground would ship the wine to consumers for free.

9           142. TPVG made its first growth capital loan of \$2.25 million (Prime + 3.00%, 1.00%  
 10 EOT payment, maturing November 30, 2024) to Underground Enterprises on May 18, 2022.  
 11 TPVG then made a second loan to it of \$1.5 million (Prime + 3.75%, 50% EOT payment, maturing  
 12 March 31, 2025) soon after on June 9, 2022, and a third of \$2.25 million (Prime + 3.75%, 5.50%  
 13 EOT payment, maturing May 31, 2025) on August 5, 2022 – resulting in a total of \$6 million in  
 14 loans.

15           143. Underground Enterprises defaulted on its loan obligations to TPVG in April 2023  
 16 – less than one year after TPVG made its first loan to the Portfolio Company – though given all  
 17 the financial information about the Portfolio Companies available to Defendants, they undoubtedly  
 18 knew well beforehand that Underground was struggling.

19           144. Indeed, filings from Underground Enterprises’ and Pheno Wine’s bankruptcies  
 20 show that in 2021, Underground’s (including Pheno’s) gross revenue was \$19.4 million, and  
 21 \$25.5 million in 2022. But when it filed for bankruptcy on May 1, 2023 – a third of the way  
 22 through the year – the combined entities’ gross revenue for 2023 had plummeted to only \$3.2  
 23 million (i.e., to a rate that was down 38%, and on track for total revenue of just \$9.6 million for  
 24 the full year). Despite the dramatic decline in Underground’s revenue, TPVG listed the fair value  
 25 of its \$6 million in loans to Underground Enterprises at effectively the loans’ outstanding principal  
 26 amount as of December 31, 2022 in its FY 2022 10-K, which was filed on March 1, 2023.

27           145. On April 24, 2023, Underground announced on its website that it would no longer  
 28 be storing or delivering wine. On April 28, 2023, a class action lawsuit was filed against it alleging

1 that Underground was not delivering customers' paid-for wine on demand as promised (*Jensen v.*  
 2 *Underground Enterprises, Inc.*, Case No. 1:23-cv-00476 (D. Del.)); on May 1, 2023, the same day  
 3 that Underground Enterprises was served with the *Jensen* complaint, both it and Pheno Wine  
 4 filed for bankruptcy.

5       146. In its 10-Q for Q1 2023 filed on May 3, 2023, TPVG continued to report the fair  
 6 value (as of March 31, 2023) of its \$6 million in loans to Underground as \$5.855 million. Although  
 7 Underground, as of March 31, had not yet defaulted on its loan obligations to TPVG, publicly  
 8 ceased operations, or filed for bankruptcy, all three of these events had occurred by the time TPVG  
 9 made the filing in early May. TPVG's failure to write down the fair value of the loan under these  
 10 circumstances is stunning, and it defies credulity that TPVG had also failed to see this train-wreck  
 11 coming long before the first quarter of 2023. On the quarter's earnings call (by which time the  
 12 *Jensen* class action had already been pending for a month), Defendant Srivastava did not even  
 13 express surprise, stating simply that:

14           Underground Enterprises, an e-commerce retail with principal balance of \$6  
 15 million, was a downgrade [in the quarter] from Category 2 to Category 3 and has  
 16 filed for Chapter 7 bankruptcy protection. We provided an inventory-based  
 17 financing facility to the company and look to recovery on our loan from the  
 18 underlying inventory as well as other potential asset sales, including the entire  
 19 enterprise in IP.

20       147. However, by the end of second quarter on June 30, 2023, TPVG listed the fair value  
 21 of its \$6 million in Underground loans as \$3.168 million, and as of September 30 it had further  
 22 lowered that fair value to only \$1.754 million – confirming that there was never any reason to  
 23 think these loans were fully (or even close to fully) secured, or that the Underground loans were  
 24 anything other than examples of poor credit quality in TPVG's portfolio throughout the Class  
 25 Period.

26           **I. Demain/Luko**

27       148. Demain ES d/b/a Luko ("Luko"), which is based in France, offers digital home  
 28 insurance in European markets. TPVG initially invested in Luko on December 28, 2021 with two  
 growth capital loans (both Prime + 6.75% interest rate, 6.00% EOT payment, maturing December  
 28, 2024) in the total amount of \$10.204 million.

1       149. Shortly after receiving these initial loans, Luko began acquiring companies,  
 2 specifically Coya, a German insurtech startup, in January 2022, and Unkle, a French company, in  
 3 an all-stock deal that closed in roughly March 2022. In April 2022, Luko took out at least one  
 4 additional loan from a non-TriplePoint lender (BNP Paribas) for around €1 million. TPVG then  
 5 made a third loan to Luko for \$7.178 million (Prime + 7.75%, 6.00% EOT payment, maturing July  
 6 31, 2025) on August 4, 2022. In its Q3 2022 Form 10-Q, TPVG reported the fair value of its  
 7 combined \$17.382 million in loans to Luko as \$15.315 million.

8       150. By late 2022, however, things were going very wrong at Luko. Specifically, Luko’s  
 9 efforts to complete a new “Series C” round of funding from investors by the end of 2022 in the  
 10 amount of roughly €100 million had failed. And worse still for Luko, its failure to obtain Series  
 11 C funding triggered a clause in Luko’s agreement to purchase Unkle that required Luko to pay  
 12 Unkle’s shareholders €12 million in April 2023. Luko was unable to make the payment.

13       151. Nonetheless, as of December 31, 2022, TPVG still reported the Luko loans at  
 14 effectively the full amount of their outstanding principal value in its 2022 10-K filed on March 1,  
 15 2023 (and actually increased from the previous quarter, with a reported fair value of \$16.762  
 16 million). It reported the loans as having a fair value of \$16.627 million as of March 31, 2023 in  
 17 its Q1 2023 Form 10-Q – even though, at the time TPVG made the filing on May 3, 2023, Luko  
 18 had already missed its payment to Unkle’s shareholders. Instead, TPVG simply reported during  
 19 the Q1 2023 earnings call on May 3, 2023 that TPVG had downgraded Luko from category 2  
 20 (White) to a category 3 (Yellow) status “due to delays in its strategic financing processes.”

21       152. On June 10, 2023, Luko filed for a French “safeguard procedure” (designed for  
 22 companies that are not yet insolvent but are facing significant difficulties that may lead to  
 23 insolvency), reportedly looking to settle €45 million in debt. Four days later, on June 14, Luko’s  
 24 founder and CEO announced its sale to Admiral Group. TechCrunch and other news outlets  
 25 reported a “rumored price tag of €11 million plus an additional €3 million tied to specific  
 26 milestones” – indicating that any equity value in Luko was far below the roughly €45 million that  
 27 it already owed its other lenders, including TPVG. Moreover, the Admiral Group deal ultimately  
 28 went off the rails when, per *L’Argus de L’Assurance*, BNP Paribas appeared in the French

1 proceedings to assert that it should be repaid before other creditors (including specifically TPVG  
 2 and other TriplePoint lenders), indicating that TPVG's Luko loans were not as senior or secured  
 3 as TPVG frequently claimed "most" of its loans were.

4       153. In short, the Luko story is only further evidence of Defendants' Class Period  
 5 misrepresentations concerning the "high quality" of its loan portfolio, even though the full extent  
 6 of TPVG's losses on the deal have yet to be determined.

7           **J. Untitled Labs/Made Renovation**

8       154. Untitled Labs, d/b/a Made Renovation, was a bathroom remodeling company that  
 9 relied heavily on high-tech tools to allow its users to choose between a variety of bathroom  
 10 templates, and then paired them with in-house project managers who were supposed to help with  
 11 required permits, assign contractors, order the necessary materials, and offer updates and  
 12 assistance until the renovation was complete.

13       155. TPVG made its first growth capital loan for \$4.167 million (11.50% interest, 5.00%  
 14 EOT payment, maturing June 30, 2026) to Untitled Labs on June 23, 2022. A few months later,  
 15 on October 20, 2022, it made a second loan for \$5.833 million (13.00% interest, 5.00% EOT  
 16 payment, maturing October 31, 2026).

17       156. However, as would later be reported in an August 8, 2023 article published by  
 18 TechCrunch, Untitled Labs' business was a disaster. The article, entitled, "Made Renovation  
 19 promises 'tech-enabled' remodels; customers describe 'absolute nightmare,'" reported that even  
 20 the best "tech-enabled" features cannot account for the fact that any construction job will require  
 21 oversight, inventory management, and contractors – and that Untitled Labs customers complained  
 22 about being left to fend for themselves, being forced to store inventory until contractors were ready  
 23 to install it, and being matched with contractors who were unwilling to take the jobs on the terms  
 24 Untitled Labs had promised its customers. And on October 18, 2023, TechCrunch published a  
 25 second article on Untitled Labs entitled "Made Renovation, which intrigued, then infuriated, its  
 26 customers, is shutting down."

27       157. The October 18 TechCrunch article also reprinted a letter sent to Untitled Labs'  
 28 shareholders by the company's newly appointed CEO:

1 To All MADE Shareholders:

2 This correspondence is to inform you that, effective October 10th, 2023, MADE  
 3 Renovations [“MADE”, the ‘Company”] announced that it had received a formal  
 4 Letter of Intent from a potential acquiror who seeks to purchase certain assets of  
 5 the Company as quickly as possible.

6 Following this sale, the company intends to close the business, release all  
 7 employees, and settle all affairs of the Company to the extent that resources and  
 8 circumstances will allow.

9 Effective on the same date, the MADE Board of Directors engaged the services of  
 10 Diablo Management Group [“DMG”], a nationally recognized turnaround and  
 11 consulting firm, for the purpose of managing the company’s sale of assets and  
 12 business closure.<sup>[32]</sup>

13 I, Richard G. Couch, Chairman and CEO of DMG, have been appointed as CEO  
 14 and the sole Director of MADE. With this action, all Officers of the Company have  
 15 been released and all members of the Board have resigned, except Mr. Couch.

16 Although we are in active negotiations and planning with a potential purchaser, we  
 17 cannot predict a successful outcome nor make any estimate of value at this time.  
 18 Should this transaction not be completed, we will proceed with business cessation.

19 We are in the process of determining the total assets and liabilities of the Company.  
 20 While this process is underway, cash resources have sufficiently diminished such  
 21 that we have suspended payments on any past due obligations of the Company. We  
 22 will provide updates on our progress as soon as possible.

23 158. Throughout the Class Period, TPVG listed the fair value of its \$10 million of  
 24 Untitled Labs loans at effectively the full value of their outstanding principal balance – but in  
 25 TPVG’s 10-Q for 2Q 2023, TPVG had slashed their fair value to \$4.633 million. Given that  
 26 companies rarely collapse without any significant advance warning to those with access to the kind  
 27 of inside information that Defendants had – and given the evidence that Untitled Labs’ business  
 28 was unable to ever reach the stage of simply being able to deliver a reliable product or service to  
 its customers – the inference is strong that Defendants were also aware of (or at minimum  
 recklessly disregarded) the actual (poor) condition of Untitled Labs and TPVG’s loans thereto at  
 some point in 2022 – and TPVG’s quick and substantial mark-down of the loans’ value at the end  
 of the 2Q 2023 only confirms that TPVG was well aware that its loans to Untitled Labs were of  
 questionable value, and that the company had little (if any) equity value to cover its outstanding  
 debt to TPVG (or other creditors)..

---

28 <sup>32</sup> Diablo Management Group’s website lists TriplePoint as a client.

1           **K. Mind Candy**

2       159. Mind Candy Ltd. is a British company that launched in 2008 and offered a  
 3 massively multiplayer online role-playing game aimed at children aged 6-12 called “Moshi  
 4 Monsters.” The game was popular for a few years, reaching peak popularity in 2012 before  
 5 beginning to decline in 2013.

6       160. TPVG made its first loan to Mind Candy on June 25, 2014 – a growth capital loan  
 7 of \$10 million (12.00% interest rate, 9.50% EOT payment, maturing June 30, 2017) – at a time  
 8 when Moshi Monsters was already on the downswing.

9       161. Mind Candy thereafter went through some very difficult times, flirting with a  
 10 rumored bankruptcy and causing TPVG to restructure and extend the terms of its original 2014  
 11 loan. After its close brush with bankruptcy, Mind Candy rebranded as Moshi Kids and pivoted to  
 12 a new product: an app designed for children to promote mindfulness and sleep – and in TPVG’s  
 13 10-K for FY 2018, filed March 6, 2019, TPVG reduced the fair value of TPVG’s now-\$10.441  
 14 million loan<sup>33</sup> to only \$6.789 million. The loan would be restructured again in 2019, with a new  
 15 maturity date of June 30, 2022. The other terms remained the same (11.00% PIK, 3.00% cash,  
 16 9.50% EOT payment), but the outstanding principal balance was now \$12.458 million.

17       162. In early 2020, Mind Candy raised an additional \$12 million from investors, which  
 18 included a further \$1.004 million loan from TPVG (9.00% PIK interest, maturing March 31, 2023).  
 19 The terms of the original loan were also changed to a 12.00% PIK interest rate soon after, and  
 20 TPVG made another loan for \$1.003 million to Mind Candy on December 21, 2020. In its 10-Q  
 21 that TPVG filed for Q1 2022 on May 4, 2022, TPVG listed the fair value of its now-\$18.98 million  
 22 in loans to Mind Candy as \$18.767 million.

23       163. By no later than the middle of 2022, however, Mind Candy had descended to its  
 24 most precarious state yet. Indeed, on January 16, 2023, the UK’s *Daily Telegraph* published an  
 25 article entitled, “Baby sleep app developer in crunch talks over £13 million loan.” The *Telegraph*  
 26 reported:

---

27  
 28       <sup>33</sup> Because the loan was on PIK interest, the principal balance rose as interest accrued and was added to it.

1 Mind Candy, the developer of the Moshi Sleep app used by more than one million  
 2 parents, must repay a £13.7m loan to financier Triple[P]oint Capital by March. . . .  
 3 [The Moshi Sleep] app focus[e]s on helping children nod off featuring stories and  
 4 lullabies. It has been downloaded more than one million times and subscriptions  
 5 cost £7.99 per month. ***However, the company is still loss-making, according to its***  
***6 latest accounts.***

7 Losses narrowed in 2021 to £4.2m from £6.9m the previous year. Revenues  
 8 increased slightly to £5.3m. . . . Mind Candy previously avoided collapse in 2017  
 9 after renegotiating the terms of its loan with Triple[P]oint. In 2020, it raised an  
 10 extra \$12m (£10m) from investors.

11 ***But in its most recent accounts signed off on Dec 19, its auditors PwC warned***  
***12 the future of the company was in doubt if talks with lenders failed.***

13 PwC said: “Based on cash flow projections to Dec 31 2023, the company requires  
 14 further cash injections in order to continue in operational existence and will also  
 15 not be able to repay the original Triple[P]oint Capital loan by its due date of March  
 16 2023.”

17 164. Despite the fact that Mind Candy was – by its auditor’s own admission – unable to  
 18 repay TPVG’s (since-renegotiated) 2014 loan to it on the existing terms,<sup>34</sup> throughout the Class  
 19 Period, TPVG continued to list the fair value of its combined loans to Mind Candy at effectively  
 20 the face value of their outstanding principal balance. Accordingly, it was not until the publication  
 21 of another commentator’s report on TPVG’s precarious finances, which was published after The  
 22 Bear Cave report on the same day, that TPVG investors were warned about the risks posed by its  
 23 exposure to Mind Candy:

24 Mind Candy (now called Moshi Kids) is a loan that TPVG restructured in 2017 to  
 25 go payment-in-kind (i.e. accrued and deferred) interest at 12%. This appears to  
 26 have started as a \$6.5 million loan and has now grown to \$20 million in exposure  
 27 given 5-6 years of accruing yet unpaid interest. TPVG holds this loan at a fair value  
 28 of \$19 million (i.e. expecting a full repayment based on management’s current  
 assessment and no impairment). Looking closer, Moshi Kids hasn’t raised more  
 than £1.7 million since April 2020, generates £5.3 million in annual revenue  
 (growing 15%, whilst burning £3 million per year) and has 40 employees. The  
 Company’s directors stated in the 2021 annual report that to sign off as a going  
 concern the loan will need to be restructured. To think that the current expectation  
 from TPVG management is full repayment of the £19 million loan to this small  
 low-growth unprofitable consumer company is worrying.

---

26 <sup>34</sup> TPVG’s most recent filing at the time the *Telegraph* article was published (the 10-Q for 3Q 2022) still listed the  
 27 maturity date for the original loan as October 31, 2022; the second-oldest loan, which now had an outstanding principal  
 28 balance of \$1.26 million, had a maturity date of March 31, 2023, however. It is unclear whether the *Telegraph*  
 confused or conflated the first two loans, or whether TPVG had already informally (or otherwise) extended the  
 maturity date of the first loan to match the second by this point.

1       165. In TPVG’s 10-Q for Q2 2023, which was filed on August 2, 2023 – i.e., the month  
 2 before the earlier two of TPVG’s three loans to Mind Candy were set to mature (the third loan was  
 3 still set to mature on December 31, 2023) – TPVG listed the fair value of its now-\$21.978 million  
 4 in loans to Mind Candy as \$18.695 million, and in its 10-Q for 3Q 2023 filed on November 1,  
 5 2023, TPVG reported that the maturity dates for all three loans had been extended to March 31,  
 6 2024.

7       166. In sum, Mind Candy is a company with a checkered past and with no proven ability  
 8 to fully repay the roughly \$22 million in loans it owes to TPVG – and as such, it is another example  
 9 of TPVG’s significant exposure during the Class Period to a decidedly non-“high quality”  
 10 company.

11       **L. Modsy/Pencil & Pixel**

12       167. Pencil & Pixel, d/b/a Modsy, was an online interior design platform that allowed  
 13 its customers to work with an interior designer to conduct virtual room remodels using Modsy’s  
 14 proprietary software. Customers would then have the option to purchase the furniture in their  
 15 virtual room directly from Modsy.

16       168. TPVG invested twice in Modsy in 2020: once in March, with a growth capital loan  
 17 for \$10 million at an interest rate of 11.75% (7.00% EOT payment, maturing on March 31, 2024)  
 18 and once in December, with a growth capital loan for \$5 million at an interest rate of 10.25%  
 19 (6.25% EOT payment, maturing on December 31, 2024). Prior to the start of the Class Period,  
 20 Modsy had encountered a number of hurdles. Among them were the supply chain disruptions  
 21 caused by the pandemic, which continued into 2021 as Modsy’s partners struggled to fill furniture  
 22 orders, according to a piece posted by TechCrunch entitled, “Modsy brings a fresh eye to interior  
 23 design – and its own operations.”

24       169. In its Form 10-Q for Q1 2022, which TPVG filed on May 4, 2022, TPVG reported  
 25 the fair value of its loans to Modsy as \$10.363 million and \$5.044 million.

26       170. Less than two months later, in June 2022, news outlets in the startup space began  
 27 reporting that Modsy was winding down its business. TechCrunch published an article on June  
 28 29, 2022 entitled, “Modsy shuts down design services, cutting roles and disrupting orders,” which

1 described the supply chain disruptions and earlier layoffs at Modsy in 2020 which Modsy's CEO  
 2 reported were made in "an effort to maintain a sustainable business" during the "unprecedented  
 3 circumstances" of the COVID-19 pandemic. According to subsequent reporting by TechCrunch  
 4 in a July 17, 2022 article entitled, "Modsy quietly shut down while some customers were still  
 5 awaiting refunds," Modsy's CEO claimed the shut-down was the result of "[c]apital constraints  
 6 and uncertain market conditions," which forced the company to cease operations on July 6. From  
 7 there, per TechCrunch, Modsy and its assets went through an abbreviated insolvency proceeding  
 8 outside of bankruptcy that wiped out any equity stakes in the company. TPVG was one such equity  
 9 stakeholder. In its Q1 2022 filings, TPVG reported that it had purchased \$199,000 of Modsy  
 10 Preferred Stock, the fair value of which it reported as \$170,000. The next quarter, it reported the  
 11 stock's value as \$0.

12       171. Companies do not become insolvent overnight. But until TPVG downgraded  
 13 Modsy to category 5 (Red) with the filing of its Q2 2022 Form 10-Q filed on August 3, 2022,  
 14 Modsy was apparently rated as category 2 (White). Srivastava stated on the earnings call for that  
 15 quarter, which occurred on the same day, that TPVG downgraded Modsy "as a result of its formal  
 16 M&A process falling apart at the last minute and the company selling its assets here in Q3." TPVG  
 17 wrote off \$12.75 million of its combined \$15 million in loans to Modsy, and per subsequent filings,  
 18 it recovered the remaining \$2.25 million that it disclosed as its expected recovery in Q2 2022. As  
 19 Defendants did with other Portfolio Companies' "sudden" deterioration, Srivastava categorized  
 20 Modsy's collapse as "a sudden and isolated event related to specific facts and circumstances  
 21 around Modsy and its M&A process. When it was evident that the expected transaction would not  
 22 happen, we explored the alternatives and concluded this was the best outcome to minimize the loss  
 23 and put the matter behind us."

24           **M. Luminary (Roli)**

25       172. Roli, Ltd. is a London-based music technology company known for its high-tech  
 26 musical instruments, particularly its flagship product, the ROLI Seaboard: a synthesizer controller  
 27 based on the piano keyboard. TPVG began loaning money to Roli in May 2018, and continued  
 28 making a variety of loans – both growth capital and revolver, at varying interest rates and terms –

1 to it in the following years. Though Roli’s products had some devoted followers, its products were  
 2 not achieving mainstream success. Beginning in its Q2 2019 Form 10-Q, TPVG put Roli’s loans  
 3 on nonaccrual, even as TPVG made additional loans to the Portfolio Company. By its Q2 2020  
 4 earnings call in August 2020, TPVG was publicly stating that Roli’s credit risk category was 4  
 5 (Orange). By 2Q 2021, the interest rates for all of TPVG’s debt investments in Roli (with the  
 6 exception of one convertible note for \$2.252 million, the fair value of which TPVG reported as  
 7 \$0) had switched from normal interest to PIK interest, and the loans all remained on nonaccrual.

8       173. Roli’s financial condition continued to deteriorate after that point, with the  
 9 company filing for administration (similar, but not identical, to bankruptcy) under U.K. business  
 10 law at the start of September 2021. Roli emerged from the administration process as a new  
 11 company, Luminary Roli, that was helmed by Roli’s founder and which continued to carry Roli  
 12 products. Unfortunately for Roli shareholders (including TPVG, which had purchased \$644,000  
 13 worth of shares in Roli), however, their equity stakes in the company were wiped out in the  
 14 transition.

15       174. TPVG’s investments in Roli, though they carried over to the new entity (Luminary  
 16 Roli Ltd.) looked radically different. Instead of eight growth capital loans, three revolvers, and  
 17 one convertible note with a combined outstanding principal balance of \$31.27 million, TPVG now  
 18 had one growth capital loan – no interest, no EOT payment – for \$35.491 million on nonaccrual  
 19 maturing on August 31, 2026. On the quarter’s earnings call, Defendant Srivastava pitched this  
 20 outcome as a “success[],” with TPVG’s loan “assumed in full, including full end-of-term  
 21 payments” (presumably incorporated from the previous loan, as the reconstituted loan did not list  
 22 EOT payments in its terms) “and accrued interest.” Despite this “successful” outcome, Srivastava  
 23 also stated that “based on these events, [TPVG] recorded an \$8 million unrealized loss against our  
 24 prior loan fair values during the quarter,” though he made sure to end on a positive note, adding  
 25 that “we believe they [Luminary Roli] are now in the best position they have been in some time.”

26       175. Roli did not proceed to perform as TPVG hoped, however. TPVG proceeded to  
 27 write down the fair value of its \$35.492 million growth capital loan to Roli down to \$9.896 million  
 28 (down from a fair value of \$14.544 million in the quarter immediately following the restructuring

1 of the loans) as of Q1 2022. By Q1 2023 – the end of the Class Period, and a full calendar year  
 2 later – TPVG was reporting the fair value of its loan to Roli as \$9.319 million. Its fair value was  
 3 effectively unchanged, even though the loan itself was not providing any value to TPVG on an  
 4 ongoing basis; based on TPVG’s public filings, it does not appear the loan is generating interest  
 5 (either regular or PIK) and there is no EOT payment listed. In other words, Roli apparently has  
 6 no obligations under the terms of the new loan until that loan matures on August 31, 2026, a  
 7 situation that undoubtedly inures to Roli’s favor. It has some benefits for Defendants, too,  
 8 however: it allows them to avoid being forced into a scenario where they would need to write down  
 9 or write off the loan, and acknowledge that Roli was a far weaker enterprise than their public  
 10 statements and filings reflect.

#### 11           **N. Other Companies**

12       176. In its November 1, 2023 earnings call for Q3 2023, TPVG also disclosed a number  
 13 of credit downgrades. Three e-commerce companies – Dia Styling, Outdoor Voices, and Nakdcom  
 14 One World, with a combined outstanding principal balance of \$19.4 million and a combined total  
 15 fair value of \$19.7 million – were downgraded from category 2 to category 3. Srivastava  
 16 explained:

17       During the third quarter, certain of our e-commerce and consumer portfolio  
 18 companies experienced continued challenges as they manage through ongoing  
 19 market and sector-specific issues, including negative consumer sentiment,  
 20 increasing customer acquisition costs, lower-than-expected revenue during the  
 summer, higher than normal levels of inventory and continued impact of inflation  
 on their cost of goods sold, in addition to developments in their runway extension  
 efforts, path to profitability and strategic efforts.

21       177. Srivastava also announced that TPVG was downgrading the credit ratings of two  
 22 other e-commerce companies, Project 1920 d/b/a SENREVE and Mystery Tackle Box d/b/a Catch  
 23 Co. with a combined total principal balance of \$9 million and a combined total fair value of \$7.6  
 24 million, from category 3 to category 4, “also due to these developments this quarter.” Though not  
 25 announced, both companies’ loans were put on nonaccrual as of Q3 2023.

26

27

28

1           **III. FALSE AND MISLEADING STATEMENTS AND OMISSIONS**

2           **A. Q1 2022**

3           178. Defendants' false and misleading statements began at the start of the Class Period,  
 4 when TPVG filed its Form 10-Q for Q1 2022 on May 4, 2022. Concurrent with that filing, TPVG  
 5 issued a press release (the "Q1 2022 Press Release") announcing the Company's Q1 2022 results,  
 6 which reported, *inter alia*, (a) that the fair market value of TPVG's investments as of the end of  
 7 that quarter was \$806,447,000; and (b) that TPVG had recorded \$4,737,000 in net unrealized  
 8 losses on its investments, and net investment income of \$13,547,000, for that quarter.

9           179. The Q1 2022 Press Release repeatedly emphasized the quality of its Portfolio  
 10 Company investments and the credit quality of TPVG's loan portfolio. It quoted Defendant Labe  
 11 as stating, in relevant part:

12           We are off to a great start in 2022, over-earning our quarterly dividend, hitting our  
 13 funding target, and increasing our portfolio yield, ***while maintaining high credit***  
 14 ***quality,*** said [Defendant] Labe. . . . "The venture capital ecosystem remains  
 active, our pipeline is growing, and we are experiencing robust demand for our debt  
 financing solutions from ***high-quality venture growth stage companies.***"

15           180. With respect to the Portfolio Companies' credit quality, the Q1 2022 Press Release  
 16 also stated as follows:

17           The Company maintains a credit watch list with portfolio companies placed into  
 18 one of five credit categories, with Clear, or 1, being the highest rated and red, or 5,  
 19 being the lowest. Generally, all new loans received an initial grade of White, or 2,  
 unless the portfolio company's credit quality meets the characteristics of another  
 credit category.

20           As of March 31, 2022, the weighted average investment ranking of the Company's  
 21 debt investment portfolio was 2.02, as compared to 1.87 at the end of the prior  
 22 quarter. During the quarter ended March 31, 2022, portfolio credit category  
 changes, excluding fundings and repayments, consisted of the following: one  
 portfolio company with a principal balance of \$2.5 million was downgraded from  
 White (2) to Yellow (3).

23           The following table shows the credit categories for the Company's debt investments  
 24 at fair value as of March 31, 2022 . . . .

Credit Category	Fair Value (\$ in 1,000s)	%age of Total Debt Investments	# of Portfolio Companies
Clear (1)	\$48,533	7.0%	4
White (2)	\$592,462	85.1%	40
Yellow (3)	\$45,146	6.5%	3

1	Orange (4)	\$9,896	1.4%	1
2	Red (5)	\$ -	-	-
3	<b>TOTAL</b>	<b>\$696,037</b>	<b>100%</b>	<b>48</b>

4  
5 Source: Q1 2022 Form 10-Q

6 181. That same day, TriplePoint hosted an earnings call with investors and analysts to  
7 discuss the Company's Q1 2022 results (the "Q1 2022 Earnings Call"). During the scripted portion  
8 of the Q1 2022 Earnings Call, Defendant Labe stated, in relevant part:

9 We're pleased with our strong first quarter results. We over-earned our dividend,  
10 hit our funding target, increased our portfolio yield **and maintained our credit**  
**quality . . .**

11 During a time when demand remained strong, we continue to maintain our proven  
12 and disciplined approach. We work with a select group of leading venture capital  
13 investors and with what we believe to be **the highest quality venture growth stage**  
**deals.**

14 . . .  
15 As we previously reported, we had several loan prepayments during the first  
16 quarter, reflecting the ability of our high-quality portfolio companies to complete  
17 additional funding and achieve attractive exits. . . . Underpinning on our ongoing  
18 success in our future prospects is our high credit quality portfolio that I  
19 mentioned. . . .

20 In addition, Defendant Srivastana noted that the only Portfolio Company on nonaccrual status was  
21 Luminary Roli, and with respect to the quality of TPVG's portfolio, he later commented:

22 We're not bridge financing. We're not here for companies that are unable to raise  
23 equity or that had transactions fall apart. Those are not TriplePoint companies.  
24 We're here to help those companies accelerate growth. And the data shows, right,  
25 those are the companies that are most attractive, both in good times and in volatile  
times for M&A, for follow-on equity raise **and the cream rises to the top.**

26 . . .

27 So I'd say kind of its just a consistent story we've been telling for the past several  
28 quarters of this, again, portfolio growth, the demand in the market, just our  
discipline in terms of how we're underwriting. We're not doing anything different.  
**If anything, we're, again, being a little tougher, given the overall volatility, but**  
**we're pleased with what we're seeing from market demand and market quality.**

29 In addition, Defendant Mathieu commented:

30 During the first quarter, we continued to generate substantial core interest income  
31 from our high-quality loan portfolio. . . . We deployed capital using our attractive  
32 sources of leverage **while maintaining excellent credit quality . . .**

1           182. In its Form 10-Q, TPVG reported the same fair market value, net unrealized gains  
 2 (losses) on investments, and net investment income figures as set forth in TPVG's previously-  
 3 referenced Q1 2022 Press Release. The 10-Q also reported fair values for the assets of the Portfolio  
 4 Companies discussed above (to the extent the assets had been acquired at the time of the filing) as  
 5 of the quarter's end:

<i>Company</i>	<i>Investment Type</i>	<i>Date Inv. Was Made</i>	<i>Prin. Bal./Acq. Cost<sup>35</sup></i>	<i>Fair Value<sup>36</sup></i>	<i>Maturity Date</i>

Source: Q1 2022 Press Release

183. At the time Defendants made the statements referenced in ¶¶178-182, TPVG's \$30 million in loans to Medly (roughly 4.3% of its debt investments at fair value) were already subordinated to \$20 million in loans from Silicon Valley Bank; Medly had purportedly diverted funds intended to go towards it operations to the acquisition of Pharmaca, leaving it with very little cash on hand; Hi.Q (to which TPVG had made roughly \$20 million in loans, or about 2.9% of its debt investments at fair value) had already been subjected to at least *seven* class actions alleging that Hi.Q's sales practices violated the TCPA; and Mind Candy (which owed TPVG just under \$19 million, and which represented about 2.7% of its debt investments at fair value) had already

<sup>37</sup> On nonaccrual, no interest rate listed.

1 renegotiated its loans with TPVG to avoid a catastrophic default at least twice. The loans to these  
 2 three companies represented **9.8%** of the fair value of TPVG's loan portfolio.

3       184. The statements referenced in ¶¶178-182 were thus materially false and misleading  
 4 because they (a) failed to disclose material adverse facts concerning the decay in TPVG's financial  
 5 condition and prospects, including the material decay in TPVG's investment portfolio as detailed  
 6 above; (b) misrepresented the true quality of TPVG's various Portfolio Companies and loan book,  
 7 as well as the viability of its overall investment strategy; and (c) overstated the quarter-end value  
 8 of TPVG's investment portfolio, the amount of TPVG's actual quarterly net unrealized gains on  
 9 investments, and the amount of TPVG's actual quarterly net increase in net assets resulting from  
 10 operations.

11           **B. Q2 2022**

12       185. Concurrent with the filing of its Q2 2022 Form 10-Q on August 3, 2022, TPVG  
 13 issued a press release (the "Q2 2022 Press Release") announcing the Company's Q2 2022 results,  
 14 which reported, inter alia, (a) that the fair market value of TPVG's investments as of the end of  
 15 that quarter was \$876,718,000; and (b) that TPVG had recorded \$26,322,000 in net unrealized  
 16 losses on its investments, and net investment income of \$12,654,000, for that quarter.

17       186. As they did in the Q1 2022 Press Release, Defendants touted the quality of TPVG's  
 18 loan portfolio, the Portfolio Companies more generally, and the portfolio's credit quality in the Q2  
 19 2022 Press Release. Defendant Labe was quoted as stating, in relevant part:

20           Despite the volatile markets, the demand for our debt financing remains strong,"  
 21 said [Defendant] Labe. . . . "With our focus on ***high quality venture growth stage***  
 22 ***companies***, we achieved several key objectives during the quarter including  
 growing our portfolio to record levels, over-earning our dividend, and generating  
 strong portfolio yields."

23 The release also quoted Defendant Srivastava as stating, in relevant part:

24           "In this market, we continue to concentrate on ***maintaining the quality of our***  
 25 ***investment portfolio*** and deploying our capital in a disciplined manner to create  
 long-term shareholder value."

26       187. With respect to credit quality, the Q2 2022 Press Release also stated as follows:

27           The Company maintains a credit watch list with portfolio companies placed into  
 28 one of five credit categories, with Clear, or 1, being the highest rated and red, or 5,  
 being the lowest. Generally, all new loans received an initial grade of White, or 2,

unless the portfolio company's credit quality meets the characteristics of another credit category.

As of June 30, 2022, the weighted average investment ranking of the Company's debt investment portfolio was 2.06, as compared to 2.02 at the end of the prior quarter. During the quarter ended June 30, 2022, portfolio credit category changes, excluding fundings and repayments, consisted of the following: one portfolio company with a principal balance of \$2.5 million was upgraded from Yellow (3) to White (2); two portfolio companies with a combined principal balance of \$28.4 million were downgraded from White (2) to Yellow (3), and one portfolio company<sup>38</sup> with a principal balance of \$15.0 million was downgraded from White (2) to Red (5).

The following table shows the credit categories for the Company's debt investments at fair value as of June 30, 2022 . . . .

Credit Category	Fair Value (\$ in 1,000s)	%age of Total Debt Investments	# of Portfolio Companies
Clear (1)	\$45,681	5.9%	3
White (2)	\$642,346	83.6%	47
Yellow (3)	\$69,364	9.0%	4
Orange (4)	\$9,152	1.2%	1
Red (5)	\$2,250	0.3%	1
<b>TOTAL</b>	<b>\$768,793</b>	<b>100%</b>	<b>56</b>

*Source: Q2 2022 Press Release*

188. That same day, TPVG hosted an earnings call with investors and analysts to discuss the Company's Q2 2022 results (the "Q2 2022 Earnings Call"). During the scripted portion of the Q2 2022 Earnings Call Defendant Labe stated, in relevant part:

Against the background of macroeconomic uncertainty, we continue to make strong progress executing against the plan that we laid out at the beginning of the year. Demand for our debt financing in the quarter was strong, and we maintained our focus working with our select leading venture capital investors and ***continuing with our disciplined approach of investing in what we believe are the highest-quality venture growth deals....***

...  
**We also continue to be more selective in our underwriting** with a focus on lower total leverage and slightly higher pricing, which reflects the brand, reputation and track record of the TriplePoint platform and our 100% direct originations business. Prospective Portfolio Companies today, ***the high quality ones,*** are also being more

---

<sup>38</sup> The company that was downgraded to "Red" was Pencil & Pixel, Inc (a/k/a "Modsy"), and was accompanied by TPVG's decision to write down the value of that loan from \$15 million to \$2.25 million. TPVG, during its analyst conference call later that day, tried to assure investors described Modsy write down was due to a "sudden and isolated event related to specific facts and circumstances around Modsy."

1           selective and they're seeking a dependable and proven debt financing partner.  
 2           When it comes to debt, they're not solving for rate or the largest deal, but more the  
 3           best long-term partner, and that is where TriplePoint outperforms.

4           While seeking to capitalize on the strong deal flow, we will continue to be mindful  
 5           of the times and maintain our ***strict credit discipline***....

6           During the call, both Defendants Srivastava and Mathieu also referenced TPVG's "exceptional"  
 7           and "high-quality" loan portfolio, and also reassured investors that, if anything, TPVG's  
 8           investment criteria in the current investment environment were "in most cases are more stringent"  
 9           than they had been in the past.

10          189. Also on August 3, 2022, TPVG issued its quarterly report on Form 10-Q setting  
 11          forth the Company's Q2 2022 results, which reported the same fair market value, net unrealized  
 12          gains (losses) on investments, and net investment income figures as set forth in TPVG's  
 13          previously-referenced Q2 2022 Press Release. In addition, the 10-Q also reported the on the fair  
 14          value of the assets of the Portfolio Companies discussed above at the end of the quarter (entries  
 15          highlighted in yellow represent investments made during the reporting period):

Source: Q2 2022 Form 10-Q

190. Between May 4, 2022 and August 3, 2022, when Defendants made the statements referenced in ¶¶185-189, the following events had occurred, in addition to those described above in ¶183: an eighth TCPA class action had been filed against Hi.Q (3.3% of the fair value of TPVG's loan portfolio); Capsule (2% of the fair value of TPVG's loan portfolio) was the subject of a major cyberattack and data breach, which would ultimately generate at least two class actions against the company; TPVG was in the process of renegotiating its loan to Mind Candy (2.3% of the fair value of TPVG's loan portfolio), which was set to mature during the quarter; and Modsy's formal M&A process had collapsed, causing TPVG to write off 85% of its loans to Modsy (once written down, 0.3% of the fair value of TPVG's loan portfolio). Together, the loans to these four companies (along with TPVG's loans to Medly) represented 11.8% of the fair value of TPVG's loan portfolio.

191. The statements referenced in ¶¶185-189 were thus materially false and misleading because they: (a) failed to disclose material adverse facts concerning the decay in TPVG's financial condition and prospects, including the material decay in TPVG's investment portfolio as detailed above; (b) misrepresented the true quality of TPVG's various Portfolio Companies and loan book, as well as the viability of its overall investment strategy; and (c) overstated the quarter-end value of TPVG's investment portfolio, the amount of TPVG's actual quarterly net unrealized gains on investments, and the amount of TPVG's actual quarterly net increase in net assets resulting from operations.

1           **C. Q3 2022**

2       192. On November 2, 2022, TPVG issued a press release announcing the Company's  
 3 Q3 2022 results (the "Q3 2022 Press Release"), which reported, *inter alia*, (a) that the fair market  
 4 value of TPVG's investments as of the end of that quarter was \$962,430,000; and (b) that TPVG  
 5 had recorded \$13,187,000 in net unrealized losses on its investments, and net investment income  
 6 of \$16,860,000, for that quarter.

7       193. With respect to credit quality, the Q3 2022 Press Release also stated as follows:

8       The Company maintains a credit watch list with portfolio companies placed into  
 9 one of five credit categories, with Clear, or 1, being the highest rated and red, or 5,  
 10 being the lowest. Generally, all new loans received an initial grade of White, or 2,  
 unless the portfolio company's credit quality meets the characteristics of another  
 credit category.

11      As of September 30, 2022, the weighted average investment ranking of the  
 12 Company's debt investment portfolio was 2.04, as compared to 2.06 at the end of  
 13 the prior quarter. During the quarter ended September 30, 2022, portfolio credit  
 14 category changes, excluding fundings and repayments, consisted of the following:  
 15 one portfolio company with a principal balance of \$14.0 million was upgraded from  
 16 White (2) to Clear (1); one portfolio company with a principal balance of \$25.0  
 17 million was upgraded from Yellow (3) to White (2); one portfolio company with a  
 18 principal balance of \$34.3 million was downgraded from White (2) to Yellow (3)<sup>43</sup>;  
 19 and one portfolio company with a principal balance of \$15.0 million was sold and  
 20 removed from Red (5) and from the Company's investment portfolio.

21      The following table shows the credit categories for the Company's debt investments  
 22 at fair value as of September 30, 2022 . . .

<b>Credit Category</b>	<b>Fair Value (\$ in 1,000s)</b>	<b>%age of Total Debt Investments</b>	<b># of Portfolio Companies</b>

Red (5)	\$ -	- %	-
<b>TOTAL</b>	<b>\$856,659</b>	<b>100%</b>	<b>59</b>

24      Source: *Q3 2022 Press Release*

---

25  
 26  
 27      <sup>43</sup> The investment that was downgraded was Medly Health, which as of the quarter's end had a total outstanding  
 28 unpaid principal balance owed to TPVG of \$34.3 million. On its conference call late that day, TPVG attributed the  
 downgrade from category 2 to category 3 to "reductions in its operating plan, changes in its senior team and [its]  
 overall liquidity position."

1           194. That same day, TriplePoint hosted an earnings call with investors and analysts to  
 2 discuss the Company's Q3 2022 results (the "Q3 2022 Earnings Call"). During the scripted portion  
 3 of the Q3 2022 Earnings Call, Defendant Labe stated, in relevant part:

4           To [summarize], we've demonstrated the significant earnings power of our sizeable  
 5 and ***high quality portfolio*** through growing it now to nearly \$1 billion, generating  
 6 record NI<sup>I</sup> [net investment income] and posting attractive portfolio yield. We  
 7 expect conditions to continue into 2023 and beyond, ***allowing us to continue to invest in a highly selective and disciplined manner with compelling growth stage companies.*** . . .

8           195. Also on November 2, 2022, TPVG issued its quarterly report on Form 10-Q setting  
 9 forth the Company's Q3 2022 results, which reported the same fair market value, net unrealized  
 10 gains (losses) on investments, and net investment income figures as set forth in TPVG's  
 11 previously-referenced Q3 2022 Press Release. In addition, the 10-Q also reported on the fair value  
 12 of the assets of the Portfolio Companies discussed above as of the quarter's end:

Source: Q3 2022 Form 10-Q

196. Between August 3, 2022 and November 2, 2022, when Defendants made the statements referenced in ¶¶192-195, the following events had occurred, in addition to those described above in ¶¶183, 190: Medly (3.3% of the fair value of TPVG's loan portfolio) had learned it would not be receiving an additional **\$130 million** in anticipated funding, which caused its sales to plummet (as it could not fill orders) and forced the company to terminate half of its workforce; TPVG had funded a \$20 million loan to The Pill Club (2.3% of the fair value of TPVG's loan portfolio) even as the company engaged in settlement negotiations over serious claims of fraudulent billing practices alleged by the California Attorney General and others; VanMoof's (1.4% of the fair value of TPVG's loan portfolio) financial struggles had grown so dire that it was asking vendors to defer payment; RenoRun (0.33% of the fair value of TPVG's loan portfolio) had conducted two major layoffs and was struggling to pay vendors; Capsule (1.8% of the fair value of TPVG's loan portfolio) had begun experiencing significant issues with the rollout of its automated fulfillment facility; and TPVG was *still* renegotiating its loan with Mind Candy (2.2% of the fair value of TPVG's loan portfolio).

197. Together, the loans to these six companies (along with TPVG's loans to Hi.Q) represented **14.2%** of the fair value of TPVG's loan portfolio.

198. The statements referenced in ¶¶192-195 were thus materially false and misleading because they (a) failed to disclose material adverse facts concerning the decay in TPVG's financial

1 condition and prospects, including the material decay in TPVG's investment portfolio as detailed  
 2 above; (b) misrepresented the true quality of TPVG's various Portfolio Companies and loan book,  
 3 as well as the viability of its overall investment strategy; and (c) overstated the quarter-end value  
 4 of TPVG's investment portfolio, the amount of TPVG's actual quarterly net unrealized gains on  
 5 investments, and the amount of TPVG's actual quarterly net increase in net assets resulting from  
 6 operations.

7       **D. Q4 2022**

8       199. On March 1, 2023, concurrent with the filing of its 2022 Form 10-K, TPVG issued  
 9 a press release (the "Q4 2022 Press Release") announcing the Company's Q4 and full year 2022  
 10 results, which reported, inter alia, (a) that the fair market value of TPVG's investments as of the  
 11 end of that quarter was \$949,276,000; and (b) that TPVG had recorded \$37,625,000 in net  
 12 unrealized losses on its investments, and net investment income of \$63,555,000, for that quarter.

13      200. The Q4 2022 Press Release also quoted Defendant Labe as stating, in relevant part:  
 14      "During 2022, we remained selective and grew the portfolio to record levels,  
 15 achieving both record total investment income and net investment income while  
 16 over-earning our distribution," said Jim Labe. . . . "Based on our portfolio's earning  
 17 power, our board increased our quarterly distribution 8% for the quarter,  
 18 representing our second consecutive quarterly increase and a total increase of 11%  
 19 since third quarter 2022."

20      The press release also quoted Defendant Srivastava as stating:

21      "We believe that the steps we have taken to **further enhance our portfolio** and  
 22 funding diversification position us well to create sustainable shareholder value,"  
 23 said [Defendant] Srivastava. . . . "our focus remains on taking advantage of  
 24 **compelling** growth-stage venture lending opportunities to expand and further  
 25 diversify the portfolio in a prudent manner and increase shareholder returns over  
 time."

26      201. With respect to credit quality, the March 2023 press release also stated as follows:

27      The Company maintains a credit watch list with portfolio companies placed into  
 28 one of five credit categories, with Clear, or 1, being the highest rated and red, or 5,  
 29 being the lowest. Generally, all new loans received an initial grade of White, or 2,  
 30 unless the portfolio company's credit quality meets the characteristics of another  
 31 credit category.

32      As of December 31, 2022, the weighted average investment ranking of the  
 33 Company's debt investment portfolio was 2.06, as compared to 2.04 at the end of  
 34 the prior quarter. During the quarter ended December 31, 2022, portfolio credit  
 35 category changes, excluding fundings and repayments, consisted of the following:

1 two portfolio companies with an aggregate principal balance of \$43.9 million was  
 2 downgraded from White (2) to Yellow (3).<sup>47</sup>

3 The following table shows the credit categories for the Company's debt investments  
 4 at fair value as of December 31, 2022<sup>48</sup> . . . .

Credit Category	Fair Value (\$ in 1,000s)	%age of Total Debt Investments	# of Portfolio Companies
Clear (1)	\$55,921	6.6%	3
White (2)	\$699,008	81.9%	48
Yellow (3)	\$88,912	10.4%	5
Orange (4)	\$9,110	1.1%	1
Red (5)	\$ -	- %	-
<b>TOTAL</b>	<b>\$852,951</b>	<b>100%</b>	<b>57</b>

5

 9  
 10 *Source: Q4 2022 Press Release*

11  
 12 202. That same day, TPVG filed an Annual Report on Form 10-K with the SEC,  
 13 reporting the Company's financial and operating results for the year ended December 31, 2022.  
 14 The 2022 10-K contained substantively similar discussions of the Company's business overview  
 15 and investment strategy as discussed herein.

16  
 17 203. Appended to the 2022 10-K as exhibits were signed certifications pursuant to SOX  
 18 by Defendants Labe and Mathieu, attesting that “[t]he information contained in the [2022 10-K]  
 19 fairly presents, in all material respects, the financial condition and results of operations of  
 [TPVG].”

20  
 21 204. Also on March 1, 2023, TPVG hosted an earnings call with investors and analysts  
 22 to discuss the Company's Q4 2022 results (the “Q4 2022 Earnings Call”). During the Q4 2022  
 23 Earnings Call, Defendant Srivastava stated, in relevant part:

24  
 25 Signed term sheets and closed commitments during Q4 reflected our ***continued discipline*** as we seek to select only the ***highest quality opportunities***.

---

26<sup>47</sup> During the analyst conference call held later that day, Defendant Srivastava disclosed that these two  
 27 companies were VanMoof and Heath IQ (a/k/a HiQ). As he stated: “VanMoof, an e-bike company with a principal  
 28 balance of \$19 million, and Health IQ, an insurtech [sic] company with a principal balance of \$25 million, were  
 downgraded from category 2 to category 3. Both were downgraded due to developments in their strategic financing  
 processes.”

Additional data as of December 31, 2021 omitted.

1           ...

2           Moving on to credit quality, approximately 89% of our portfolio is ranked in our  
3           two best scores, which means they are performing at or above expectations.

4           Moreover, although both Defendants Labe and Srivastava admitted on the call that that TPVG had  
5           been forced to write off its entire \$30 million investment in Medly Health as of the end of 2022,  
6           Labe went out of his way to characterize the collapse of Medly Health and the loss of TPVG's  
7           entire investment as due to a "sudden and unpredictable development [that] was characterized by  
8           very extraordinary and extenuating circumstances" involving the "loss of anticipated financing  
9           and the discovery of certain operational, financial and accounting irregularities."

10           205. Also on March 1, 2023, TPVG issued its report for the year ended December 31,  
11           2022 on Form 10-K setting forth the Company's FY and Q4 2022 results, which reported the same  
12           fair market value, net unrealized gains (losses) on investments, and net investment income figures  
13           as set forth in TPVG's previously referenced Q4 2022 Press Release. In addition, the 10-K also  
14           reported the following as the fair value of the referenced Portfolio Companies' assets at the end of  
15           the year:

<i>Company</i>	<i>Investment Type</i>	<i>Date Inv. Was Made</i>	<i>Prin. Bal./Acq. Cost<sup>49</sup></i>	<i>Fair Value<sup>50</sup></i>	<i>Maturity Date</i>

Source: 2022 Form 10-K

206. Between November 2, 2022 and March 1, 2023, when Defendants made the statements referenced in ¶¶199-205, the following events had occurred, in addition to those described above in ¶¶183, 190, 196: Medly had filed for bankruptcy and sold its assets, the proceeds of which failed to reach TPVG as the junior lender and forced TPVG to write off the loan in full; The Pill Club (2.3% of the fair value of TPVG's loan portfolio) had publicly settled the allegations of fraudulent billing practices against it; Hi.Q (2.6% of the fair value of TPVG's loan portfolio) had laid off nearly its entire workforce and stopped paying vendors, leading to at least **nine** vendors suing it; VanMoof (2% of the fair value of TPVG's loan portfolio) had publicly acknowledged that its ability to remain a going concern was in question; RenoRun (0.33% of the fair value of TPVG's loan portfolio) had failed to raise funds from past investors and had terminated the majority of its remaining workforce; Capsule (1.8% of the fair value of TPVG's loan portfolio) had cut 15% of its staff and shuttered services in two locations in an attempt to reduce its high cash burn; Good Eggs' (1.4% of the fair value of TPVG's loan portfolio) revenue had dropped 18% YoY in 2022 and it had failed to find a buyer in 2022; Luko (2% of the fair value of TPVG's loan portfolio) had tried and failed to raise around €100 million in a funding round from investors; and news outlets had reported that Mind Candy (2.2% of the fair value of TPVG's loan portfolio) would not be able to repay its (thrice-renegotiated) loan from TPVG on schedule.

1       207. Together, the loans to these nine companies (minus Medly, as Medly's loans were  
 2 written off in full during the quarter) represented **14.7%** of the fair value of TPVG's loan portfolio.

3       208. Although the disclosures referenced above did, in part, *begin* to reveal the existence  
 4 of some of the decay in TPVG's investment portfolio, such disclosures were at best partial, and  
 5 accordingly, as stated in the "Truth Gradually Begins to Emerge" section below, the fraud  
 6 continued. Indeed, the statements referenced in ¶¶199-205 above were materially false and  
 7 misleading because they (a) failed to disclose material adverse facts concerning the decay in  
 8 TPVG's financial condition and prospects, including the material decay in the TPVG's investment  
 9 portfolio (other than those associated with Medly Health, VanMoof and Hi.Q), as detailed above;  
 10 (b) misrepresented the true quality of TPVG's various Portfolio Companies and loan book, as well  
 11 as the viability of its overall investment strategy (including but not limited to downplaying the  
 12 seriousness of and credit implications of the problems at VanMoof and Hi.Q); and (c) overstated  
 13 the quarter-end value of TPVG's investment portfolio, the amount of TPVG's actual quarterly net  
 14 unrealized gains on investments, and the amount of TPVG's actual quarterly net increase in net  
 15 assets resulting from operations.

16 **IV. THE TRUTH BEGINS TO EMERGE**

17 **A. During the Class Period**

18       209. On March 1, 2023, TPVG issued its financial results for the year and quarter ended  
 19 December 31, 2022. The Company's reported earnings beat analyst consensus earnings, causing  
 20 the price of TPVG shares to rise from a closing price of \$11.68 on March 1 to \$12.28 on March 2,  
 21 2023. This "topline" good news effectively outweighed certain other less positive news that TPVG  
 22 also released on March 1, which included its disclosure that it had *written off the entirety* of its  
 23 roughly \$34 million investment in Medly Health, and that it had downgraded its loan investments  
 24 in two (though only two) other Portfolio Companies: its roughly \$19 million in outstanding loans  
 25 to VanMoof and its roughly \$25 million to Health IQ (HiQ) from "category 2" to "category 3" due  
 26 to "developments in their strategic financing processes."

27       210. Although the disclosures referenced above did, in part, begin to reveal the existence  
 28 of some of the decay in TPVG's investment portfolio, such disclosures were at best partial as they

1 failed to accurately reflect that the VanMoof and HiQ loans had deteriorated well beyond “category  
 2 3” condition; that the condition of numerous other loans in TPVG’s portfolio had also decayed;  
 3 and that the credit quality of the Company’s loan portfolio was anything but “high quality” or  
 4 reflective of “strict” lending criteria (as Defendants had repeatedly represented over the past year;  
 5 *see* §III above). Accordingly, the fraud continued, and investors continued to be materially misled  
 6 as to, *inter alia*, the true quality of TPVG’s investment portfolio and the Company’s overall  
 7 condition and prospects.

8       211. On May 2, 2023 – the day before TPVG planned to issue its financial results and  
 9 accompanying earnings release and Form 10-Q for the first quarter of 2023 – a widely read stock  
 10 newsletter published by market analyst Edwin Dorset, called ***The Bear Cave***, published a piece on  
 11 TPVG. The article was entitled “Problems at TriplePoint Venture Growth BDC (TPVG),” raised  
 12 serious concerns about TPVG’s actual health and condition, and flagged a host of issues indicating  
 13 that the credit quality of TPVG’s investment portfolio was far worse than what Defendants had  
 14 been representing to investors. As ***The Bear Cave*** reported:

15       TriplePoint Venture Growth BDC (NYSE: TPVG – \$421 million) describes itself  
 16 as “a leading global financing provider devoted to serving venture capital-backed  
 17 companies.” ***In reality, TriplePoint is encumbered by high fees, weak  
 management, and a weaker loan book saddled by portfolio company bankruptcies  
 and upside-down startups.*** The Bear Cave believes ***TriplePoint’s equity may be  
 severely impaired, if it has any value at all.***

18       ...  
 19       TriplePoint charges investors 1.75% of the fund’s “average adjusted gross assets”  
 20 and 20% of net investment income above an 8% hurdle rate.

21       The Bear Cave believes ***TriplePoint’s net asset value decline will accelerate in the  
 coming quarters*** as TriplePoint may need to take significant write-downs in its loan  
 22 book.

23       212. After discussing TPVG’s investment fiasco involving Medly Health and how  
 24 TPVG had written off \$34.2 million in loans in Q4 2022 that it had been carrying at almost full  
 25 face value (\$31.9 million as of the end of Q3 2022) – The Bear Cave report warned that “History  
 26 seems to be repeating.” Indeed, after reviewing TPVG’s investment in The Pill Club, the Bear  
 27 Cave Report noted that TPVG had continued to carry its \$20 million outstanding principal loan to  
 28 the Pill Club at \$19.9 million in TPVG’s 2022 10-K (filed in early March 2023) – even though (a)

1 in February 2023 the Pill Club had agreed to pay \$18 million to settle insurance fraud claims  
 2 against it brought by the California Attorney General, and (b) The Pill Club's financial condition  
 3 was so dire that was forced to file for bankruptcy just two months later, in April 2023.

4       213. The Bear Cave report then proceeded to discuss several of the TPVG Portfolio  
 5 Companies previous discussed in §II above "that appear to be in substantial distress." For  
 6 example:

7           a)      With respect to Capsule – the borrower on a \$15 million loan that TPVG  
 8 was carrying at \$15.5 million, The Bear Cave, citing a limited circulation newsletter, noted  
 9 that "in recent months, [Capsule] has laid off 15% of staff, reduced operations in some  
 10 cities and shut down its service in at least two markets, Las Vegas and Pittsburgh, according  
 11 to five current and former employees. The cuts were motivated by pressure from investors,  
 12 who took issue with Capsule's high monthly cash burn – between \$10 and \$25 million a  
 13 month throughout 2022."

14           b)      With respect to VanMoof – to which TPVG had over \$18 million in loans  
 15 being carried at near face – the Report noted that VanMoof's situation had become "dire"  
 16 towards the end of 2022, that VanMoof had asked its suppliers to defer payments on their  
 17 invoices, and that VanMoof itself had warned in its annual report in late 2022 that the  
 18 company "could not guarantee" its "ability to continue its activities beyond the first quarter  
 19 of 2023" without a quick injection of new funds.

20           c)      With respect to RenoRun (\$2.25 million loan carried by TPVG at \$2.18  
 21 million, plus a convertible note carried at \$625,000 face), The Bear Cave noted that in  
 22 October 2022 RenoRun had reportedly laid off 43% of its staff and, in March 2023, had  
 23 filed for creditor protection in Quebec – and that had apparently lacked funds to pay  
 24 severance to many of its laid-off workers.

25           d)      With respect to Good Eggs (\$12.4 million in loans carried at \$12.3 million),  
 26 it had reportedly just finished raising \$7 million in new equity – but at a valuation that was  
 27 90% lower than in its prior equity raise rounds; the Company was also still burning through  
 28 \$1 million per month.

e) With respect to HiQ (\$25.1 million in loans carried at \$22.6 million), The Bear Cave noted that in December 2022 the company had failed to get a wrongful marketing (*i.e.* TCPA) lawsuit dismissed, that in January 2023 the company had been hit with two class action lawsuits for firing nearly 1,000 employees in violation of the federal WARN Act, and that the company appeared to have not raised any new equity since May 2019.

7        214. In addition, The Bear Cave report also raised concerns regarding TPVG's exposure  
8 to a variety of other companies, including Flink (\$25 million principal amount of loans from July  
9 and October 2022 being carried at \$23.8 million); Quick Commerce Limited (\$21 million in loans  
10 from May 2022 being carried at \$20.7 million); Cart.com (\$25 million in loans from December  
11 2021 and November 2022 being carried at \$24.8 million); and Homeward (\$25.1 million in loans  
12 from December 2021 and December 2022 being carried at \$15.01 million); among others.

13        215. In response to the news and analysis contained in the Bear Cave Report, on May 2,  
14 2023, the price of TPVG shares fell sharply, from an opening price of \$11.92 to close at \$10.97, a  
15 one-day decline of 7.97%. It declined another 2.19% to close at \$10.73 on May 3.

16        216. The following day, after the close of the market, TPVG issued a press release  
17 announcing its financial results for the first quarter of 2023, and thereafter held a conference call  
18 with analysts.

19        217. In its May 3, 2023 press release, TPVG reported, *inter alia*, (a) that the fair market  
20 value of TPVG's investments as of the end of that quarter was \$983,000,000; and (b) that TPVG  
21 had recorded \$10,867,000 in net unrealized losses on its investments, and net investment income  
22 of \$18,600,000, for the quarter.

23           218. More significantly, however, TPVG also disclosed a significant increase in the  
24 number of Portfolio Companies (and associated loan amounts) that it had downgraded as of the  
25 end of the quarter (March 31, 2023). Specifically, the May 2023 press release disclosed that  
26 although TPVG had upgraded one portfolio company (with a principal balance of \$15 million)  
27 from White (2) to Clear (1), it had downgraded ***four*** portfolio companies (with an aggregate  
28 principal balance of \$46.3 million) from White (2) to Yellow (3), and downgraded another ***two***

1 Portfolio Companies (with an aggregate principal balance of \$47.6 million) from Yellow (3) to  
 2 Orange (4). As the related conference call commentary that followed later in the day confirmed,  
 3 the four companies downgraded from White (2) to Yellow (3) were Demain (Luko) (\$17 million),  
 4 Underground Enterprises (\$6 million), The Pill Club (\$20 million), and RenoRun (\$3 million) –  
 5 and the two companies downgraded from Yellow (3) to Orange (4) were VanMoof and HiQ.

6       219. *In addition*, the press release also disclosed that, since the end of the first quarter  
 7 (March 31), *three* of these companies, The Pill Club, Underground Enterprises, and RenoRun had  
 8 filed for bankruptcy protection.

9       220. Although TPVG's reported earnings beat analyst consensus expectations, and  
 10 analysts also echoed Defendants' comments on the conference call that the recent collapses of  
 11 certain leading bank providers of venture capital financing (including Silicon Valley Bank) were  
 12 favorable developments for TPVG's business, overall analysts were more concerned about the  
 13 further news regarding credit quality problems in TPVG's investment portfolio. For example:

14           a)      In an analyst report dated May 4, 2023, Wells Fargo downgraded TPVG  
 15 from "Overweight" to "Equal Weight," and reduced its price target from \$12.00 to \$10.00  
 16 per share, adding "[e]merging credit issues and likely NAV volatility makes shares less  
 17 attractive in the near term"

18           b)      On May 3, 2023, Piper Sandler issued an analyst report that also decreased  
 19 its price target for TPVG, from \$12.50 per share to \$11.00 per share, citing concerns about  
 20 TPVG's ability to recover its loan investments through bankruptcy proceedings, and  
 21 adding "this process will take time likely measured in quarters and could be an overhang  
 22 on the stock given the uncertainty and potential for other credit issues."

23           c)      Similarly, writing some weeks later on May 22, 2023, JMP lowered its price  
 24 target on TPVG from \$13.50 to \$11.50 per share in the wake of the disclosures from earlier  
 25 in May, noting:

26                   Given a material increase in non-accruals at cost to 7.7% of the portfolio as  
 27 of March 31, with line of sight for three additional portfolio companies that  
 28 will either go on non-accrual or restructure in Q223, we share the view that  
 the recent increase in stressed investments is worrisome for investors, as an  
 increase in non-accruals is generally indicative of elevated credit costs on  
 the horizon.

1           221. In reaction to TPVG’s aftermarket disclosures on May 3, on May 4, 2022, TPVG’s  
 2 share price declined a further 8.57% to close at \$9.81.

3           **B. After the Class Period**

4           222. Since May 2023, TPVG’s portfolio has continued to experience additional write-  
 5 downs and TPVG has been forced to downgrade additional loans amidst continuing concern about  
 6 TPVG’s exposure to its “high quality” investment portfolio.

7           223. For example, in its August 2, 2023 disclosures in connection with its reporting of  
 8 TPVG’s Q2 2023 results, TPVG disclosed that although it had upgraded the rating of one problem  
 9 loan (where the now-bankrupt The Pill Club’s prior \$20 million loan had, conveniently, been  
 10 assumed by Thirty Madison as discussed above *six* other Portfolio Companies were being  
 11 downgraded, including *four* that were reduced to the lowest level of “Red.” These latest  
 12 downgrades included:

- 13           • the downgrade of Underground Enterprises (\$6 million loan  
               principal) from Yellow (3) to Red (5);
- 14           • the downgrade of Demain (Luko) (\$17 million loan principal) from  
               Yellow (3) to Red (5);
- 15           • the downgrade of HiQ (\$25.1 million loan principal) from Orange  
               (4) to Red (5);
- 16           • the downgrade of VanMoof (\$22.5 million loan principal) from  
               Orange (4) to Red (5);
- 17           • the downgrade of Mystery Tackle Box (\$5 million loan principal)  
               from White (2) to Yellow (3); and
- 18           • the downgrade of Untitled Labs a/k/a Made Renovation (\$10 million  
               loan principal) from White (2) to Yellow (3).

22           224. More recently, in its November 1, 2023 disclosures in connection with its reporting  
 23 of TPVG’s Q3 2023 results, TPVG disclosed that it had again downgraded *six* Portfolio  
 24 Companies, including another *four* that had been reduced to either “Red” or “Orange.” These  
 25 latest downgrades included:

- 26           • the downgrade of Untitled Labs a/k/a Made Renovations (\$2.7  
               million loan principal) from Orange (4) to Red (5);
- 27           • the downgrade of Project 1920 (\$4.1 million loan principal) from  
               Yellow (3) to Orange (4);

- 1           • the downgrade of Mystery Takle Box (\$5 million loan principal)  
2           from Yellow (3) to Orange (4);  
3  
4           • the downgrade of Dia Styling (\$5 million loan principal) from White  
5           (2) to Yellow (3);  
6  
7           • the downgrade of Outdoor Voices (\$6 million loan principal) from  
8           White (2) to Yellow (3); and  
9  
10          • the downgrade of Nakd One World (\$8.4 million loan principal)  
11          from White (2) to Yellow (3).

12          225. In short, as of November 1, 2023, of what Defendants had repeatedly described as  
13          “high quality” loans that it made to “compelling” venture growth companies and which had been  
14          “on TPVG’s books” for most (if not all) of the Class Period – a staggering \$226.2 million in  
15          principal amount of those loans had either been written off, been materially downgraded, or (in  
16          the case of The Pill Club) saved from disaster due to the timely intercession of a TPVG affiliate.  
17          A listing of these loans and their reported status as of November 1, 2023 is summarized below:

<b>Portfolio Co.</b>	<b>Loan Amt.</b>	<b>Status</b>
<b>Medly Health</b>	\$30 million	<i>Written off in full</i>
<b>Hi.Q</b>	\$25 million	<i>Written off in full</i>
<b>Modsy (P&amp;P)</b>	\$15 million	<i>\$12.75 million written off</i>
<b>VanMoof</b>	\$22.5 million	Red (5)
<b>Demain (Luko)</b>	\$17 million	Red (5)
<b>Untitled Labs</b>	\$10 million	Red (5)
<b>Underground Enterprises</b>	\$6 million	Red (5)
<b>Roli</b>	\$35.5 million	Orange (4)
<b>Mystery Tackle</b>	\$5 million	Orange (4)
<b>Project 1920</b>	\$2 million	Orange (4)
<b>Good Eggs</b>	\$12.5 million	Yellow (3)
<b>Nakdcom</b>	\$8.4 million	Yellow (3)
<b>Outdoor Voices</b>	\$6 million	Yellow (3)
<b>Dia Styling</b>	\$5 million	Yellow (3)
<b>RenoRun</b>	\$2.7 million	Yellow (3)
<b>The Pill Club</b>	\$20 million	<i>Restructured via TPVG affiliate</i>
<b>TOTAL</b>	<b>\$222.6 million</b>	

1           226. In addition, the above list does include other Portfolio Companies, such as Mind  
 2 Candy (\$20.7 million loan) and Capsule (\$15 million loan), which appear to continue to be  
 3 categorized as White (2), despite all of the problems and concerns discussed above with these  
 4 loans.

5           227. In addition, TPVG has had to mark-down the fair value of additional millions of  
 6 dollars of equity stakes in many of these same companies, recognizing that the value of those  
 7 equity stakes is even more sensitive to price declines than the value of corresponding debt positions  
 8 in those same companies.

9 **V. ADDITIONAL SCIENTER ALLEGATIONS**

10          228. As alleged herein, TPVG and the Individual Defendants acted with scienter in that  
 11 they: (i) knew that the public documents and statements issued or disseminated in the name of the  
 12 Company were materially false, misleading, and incomplete when made; (ii) knew that such  
 13 statements or documents would be issued or disseminated to the investing public; and (iii)  
 14 knowingly and substantially participated or acquiesced in the issuance or dissemination of such  
 15 statements or documents as primary violations of the federal securities laws. The Individual  
 16 Defendants, by virtue of their receipt of information reflecting the true facts regarding TPVG, their  
 17 control over, and/or receipt and/or modification of TPVG's allegedly materially false, misleading,  
 18 and incomplete statements and/or their associations with the Company which made them privy to  
 19 confidential proprietary information concerning TPVG, participated in the fraudulent scheme  
 20 alleged herein.

21          229. Defendants (and Labe and Srivastava in particular) were uniquely positioned with  
 22 respect to the Portfolio Companies, having access to a wealth of financial and other information  
 23 about the companies and their performance on an ongoing basis. More, Defendants (and again,  
 24 particularly Labe and Srivastava) were highly incentivized to avoid writing down the fair value of  
 25 TPVG's loans to Portfolio Companies, downgrading the credit risk category of any Portfolio  
 26 Company, or otherwise taking any action that would impair the public's perception about the value  
 27 of TPVG's loan portfolio for the reasons discussed below. In other words, Defendants knew that  
 28 the quality of its loan portfolio (and the Portfolio Companies more broadly) was deteriorating, but

1 they had strong motives to avoid disclosing that to the investing public. They also had, and  
 2 exercised, the opportunity to conceal that deterioration from TPVG's investors.

3           **A. Labe and Srivastava Had Access to Material, Non-Public Information  
 4 About Adverse Facts and Knew Their Statements Were Materially  
 5 False and Misleading, and/or Omitted Crucial Information Necessary  
 6 to Make Them Not Misleading**

7           230. Defendants Labe and Srivastava had especially unique insights into TPVG's  
 8 investments because of their roles at both TPC and TPA as described above. They were the ones  
 9 primarily responsible for selecting which investments TPVG would make via their roles at TPA,  
 10 which "is responsible for sourcing, reviewing and structuring investment opportunities for [TPVG]  
 11 [and] underwriting and performing due diligence on [TPVG's] investments." TPA was also  
 12 responsible for "monitoring [TPVG's] investment portfolio on an ongoing basis."

13           231. In the course of shepherding the investment process from beginning to end, TPA,  
 14 and Defendants Labe and Srivastava (the latter two of which serve on TPVG's Board in addition  
 15 to maintaining key roles at TPA) gain an immense amount of information about, and familiarity  
 16 with, potential and present Portfolio Companies. As a result, the Individual Defendants – and by  
 17 extension, TPVG itself – have incredibly detailed insight into the financial and business conditions  
 18 of the Portfolio Companies on a regular basis, and more frequently if a Portfolio Company appears  
 19 to be struggling. This would include critical non-public information – like the collapse of an  
 20 anticipated source of funding (Medly), or the settlement of serious fraud allegations in a *qui tam*  
 21 complaint (The Pill Club), or mass layoffs (Hi.Q) that would bear directly on the key measures by  
 22 which investors would look to ascertain the value of TPVG's investments: specifically,  
 23 TPVG's/TPA's assignment of a credit risk category to each of the Portfolio Companies and  
 24 TPVG's estimate of the fair value of its investments. As discussed above, however, the public-  
 25 facing disclosures often did not align with the knowledge that Defendants privately held to the  
 26 ultimate detriment of TPVG's investors.  
 27  
 28

1           **B. Defendants Had Motive and Opportunity to Conceal the  
2 Deteriorating Condition of TPVG's Loan Portfolio and the Portfolio  
3 Companies**

4           232. Defendants had ample reason to paint a rosy picture of the Portfolio Companies'  
5 finances and long-term sustainability, and by virtue of their placement at TPA, Defendants Labe  
6 and Srivastava had the opportunity to inflate the fair value of TPVG's investments, delay any credit  
risk downgrades, and generally avoid any negative disclosures about the Portfolio Companies.

7           233. *First*, Labe and Srivastava had both the motive and opportunity to keep the fair  
8 value of TPVG's investments at an elevated level. With respect to motive, the two men helm TPA,  
9 which receives a base management fee from TPVG every quarter based on the fair value of  
10 TPVG's assets. Per TPVG's most recent 10-K, the fee is calculated "at an annual rate of 1.75%  
11 of our average adjusted gross assets, including assets purchased with borrowed funds." The fee  
12 "is payable quarterly in arrears" and is "calculated based on the average value of [TPVG's] gross  
13 assets at the end of [TPVG's] two most recently completed calendar quarters."

14           234. The specific numbers vary from quarter to quarter, but TPVG's largest asset is  
15 always far and away its investments, the vast majority of which is in the form of its loans to  
16 Portfolio Companies. TPVG's balance sheets confirm the investments are listed as "[i]nvestments  
17 ***at fair value***" – *i.e.*, in the case of the debt investments, the fair values of the various Portfolio  
18 Company loan as determined by TPVG's board of directors, *based primarily on information*  
19 *provided to them by TPA*, as described above. The larger the fair value of TPVG's investments is,  
20 the higher TPA's base management fee will be – and as the 10-K acknowledges, "Messrs. Labe  
21 and Srivastava, each an interested member of our [TPVG's] Board, have a material pecuniary  
22 interest in [TPA] and serve on its Investment Committee." TPA and Defendants Labe and  
23 Srivastava were thus highly motivated to inflate the fair value of the investment portfolio as much  
24 as possible.

25           235. TPVG's most recent 10-K even acknowledges this incentive. In a section  
26 addressing risks related to conflicts of interest, the 10-K states:

27           For many of our investments, no market-based price quotation is available. As a  
28 result, our Board determines the fair value of these secured loans, warrant and  
equity investments in good faith . . . In connection with that determination, [TPA]  
provides our Board with valuation recommendations based upon the most recent

1 and available information, which generally includes industry outlook,  
 2 capitalization, financial statements and projected financial results of each portfolio  
 3 company. . . The participation of our Adviser's senior investment team in our  
 4 valuation process, and the pecuniary interest in our Adviser by certain members of  
 5 our Board, ***could result in a conflict of interest given that the base management  
 6 fee is based, in part, on the value of our average adjusted gross assets***, and our  
 7 Adviser's incentive fee is based, in part, on realized gains and realized and  
 8 unrealized losses.

1           238. While the nature and amounts of the investments of private TriplePoint entities are  
 2 largely unavailable to the broader public, co-investments are clearly a regular practice. The 10-K  
 3 disclosures confirm as much, as do Portfolio Company bankruptcies: TriplePoint affiliates loaned  
 4 \$81 million to Medly (about \$35 million of which was loaned by TPVG), €77.9 million to  
 5 VanMoof (about \$22.5 million of which was loaned by TPVG), \$50 million to Hi.Q (about half of  
 6 which was loaned by TPVG), \$30 million to The Pill Club (about \$20 million of which was loaned  
 7 by TPVG), and \$8 million to Underground Enterprises (\$6 million of which was loaned by TPVG).

8           239. Clearly, co-investment was the norm. In the case of these co-investments, TPA  
 9 (and consequently, TPVG) would be incentivized to avoid taking any action – such as  
 10 downgrading a Portfolio Company’s credit risk category, or writing down the fair value of a loan  
 11 – that might negatively impact TriplePoint’s broader investments in a Portfolio Company.

12          240. ***Third***, Defendants were incentivized to conceal deteriorating conditions at the  
 13 Portfolio Companies to avoid triggering a default under the terms of either their credit facility  
 14 (TPVG’s secured revolving credit facility, for which Deutsche Bank AG serves as facility agent,  
 15 referred to herein as the “Credit Facility”) or the tranches of notes it issued maturing in 2025  
 16 (4.50%, with \$70 million of principal outstanding as of the end of FY 2022), 2026 (4.50%, with  
 17 \$200 million of principal outstanding as of the same date), and 2027 (5.00%, with \$125 million of  
 18 principal outstanding as of the same date) (collectively, the “Notes”).

19          241. The Credit Facility and the Notes are hugely important to Defendants, as without  
 20 them, Defendants have no funds to invest in Portfolio Companies other than TPVG’s cash on hand  
 21 at any given time. TPVG lists the potential for default under either the Credit Facility or the Notes  
 22 as a risk relating to its business or structure. As the most recent 10-K explains:

23          *We may default under the Credit Facility, the agreements governing our  
 24 outstanding unsecured notes or any future indebtedness or be unable to amend,  
 25 repay or refinance any such facility or financing arrangement on commercially  
 reasonable terms, or at all, which could have a material adverse effect on our  
 financial condition, results of operations and cash flows.*

26          In the event we default under the Credit Facility, the agreements governing the 2025  
 27 Notes, 2026 Notes or the 2027 Notes or any future indebtedness or are unable to  
 28 amend, repay or refinance any such indebtedness on commercially reasonable  
 terms, or at all, *our business could be materially and adversely affected as we may  
 be forced to sell all or a portion of our investments quickly and prematurely at  
 what may be disadvantageous prices to us in order to meet our outstanding*

1                   ***payment obligations and/or support working capital requirements*** under the  
 2 Credit Facility, the 2025 Notes, the 2026 Notes and the 2027 Notes or any future  
 3 indebtedness, any of which would have a material adverse effect on our financial  
 4 condition, results of operations and cash flows.

5                   242. TPVG describes the potential events of default under the Credit Facility as  
 6 including “(i) a payment default; (ii) a change of control; (iii) bankruptcy; (iv) a covenant default;  
 7 and (v) breach of a key man clause relating to our Chief Executive Officer, James P. Labe, and our  
 8 President and Chief Investment Officer, Sajal K. Srivastava; and (vi) our failure to maintain our  
 9 qualification as a BDC.”

10                  243. The Credit Facility financing agreement itself contains more specific events of  
 11 default/termination events, including if (1) the rolling three-month charged-off ratio is greater than  
 12 7.5%; (2) TPVG fails to satisfy any of the asset quality tests<sup>51</sup> for 30 or more days in a row; (3) the  
 13 three-month rolling average of the interest spread measure is less than or equal to 2%, and that  
 14 continues to the next report date; and/or (4) TPVG’s asset coverage ratio is less than required (i.e.,  
 15 below 150%) for one quarter.

16                  244. With respect to the Notes, the various Master Note Purchase Agreements include  
 17 events of default that are substantially similar between the tranches (and which themselves are  
 18 relatively similar to the Credit Facility events of default), including, among other things, if TPVG  
 19 fails to maintain a minimum asset coverage ratio of 1.50 to 1.00 or a minimum interest coverage  
 20 ratio of 1.25 to 1.00. A default under the Notes could also prompt a default under the Credit  
 21 Facility, or vice versa. As the 10-K notes, “[b]ecause the Credit Facility and the agreements  
 22 governing the [Notes] have, and any future credit facilities will likely have, customary cross-  
 23 default provisions, if the indebtedness under the Credit Facility or represented by the [Notes], or

---

24                  51         The financing agreement defines “asset quality tests” as the Minimum Weighted Average APR Test (met as  
 25 of a given date if the weighted average APR of all eligible contracts that are fixed rate contracts is equal to or greater  
 26 than 6.00%), the Minimum Weighted Average Spread Test (met as of a given date if the weighted average floating  
 27 spread of all eligible contracts that bear interest at a spread over the Prime Rate is equal to or greater than 2.50%), the  
 28 Maximum Weighted Average Remaining Maturity Test (met as of a given date if the weighted average remaining  
 maturity of all eligible contracts is less than or equal to 3.75 years), Maximum Weighted Average Debt-to-Valuation  
 Test (met as of a given date if the weighted average debt-to-valuation of all eligible contracts is less than or equal to  
 25%) and the Minimum Weighted Average IRR Test (met as of a given date if the weighted average IRR of all eligible  
 contracts is equal to or greater than 10%).

1 under any future credit facility, is accelerated, we may be unable to repay or finance the amounts  
 2 due.”

3       245. Given that Defendants could not make *any* loans without the funds to do so, and  
 4 given that Defendants are primarily reliant upon the Credit Facility and the Notes for funding, a  
 5 default under either would be devastating to Defendants’ business. Many of the events of default  
 6 are tethered to the quality of the assets under TPVG’s management, and as such, Defendants were  
 7 highly incentivized to avoid acknowledging the impairment of TPVG’s loan portfolio in any way  
 8 that might risk a default under the Credit Facility and/or the Notes.

9       246. ***Fourth***, in the middle of the Class Period, TPVG sold 3.75 million shares at \$13.75  
 10 per share through a second public offering (SPO) on August 9, 2022, generating net proceeds of  
 11 approximately \$49.766 million, TPVG stated in the August 5, 2022 supplement to the prospectus  
 12 dated May 26, 2021 (collectively, the “Offering Documents”) that the proceeds would be used “to  
 13 repay outstanding debt borrowed under its credit facility” before TPVG would “re-borrow” its  
 14 “initial repayments under the credit facility” with the intent “to make investments in accordance  
 15 with its investment objectives and strategies, to pay its operating expenses and other cash  
 16 obligations, and for general corporate purposes.” These Offering Documents contained many of  
 17 the same material misstatements and omissions that Defendants had issued throughout the Class  
 18 Period.

19       247. In issuing this SPO in the midst of the Class Period before the truth had been  
 20 revealed or the undisclosed risks Defendants concealed had materialized, TPVG benefited from  
 21 an elevated share price. Had the market known the truth, TPVG’s common stock would have  
 22 traded at a significantly lower price, reducing the amount of money the Company would have  
 23 raised in the SPO.

24       248. ***Finally***, TPVG often has equity positions in the Portfolio Companies in which it  
 25 invests. Any public dissemination of negative information – whether a credit risk downgrade or  
 26 the markdown of a loan – about one of the companies could have a downstream impact on the  
 27 company’s prospects going forward, which could negatively impact TPVG’s equity position.

1           **C. The Core Operations Doctrine Applies**

2       249. TPVG’s primary asset was its loan portfolio. In TPVG’s Q1 2022 Form 10-Q, the  
 3 filing of which marked the start of the Class Period, TPVG reported its investments at fair value  
 4 as approximately \$806,447,000, and the fair value of its debt investments as approximately  
 5 \$696,037,000 – roughly **86.3%** of its investments at fair value. The value of its loan portfolio is  
 6 thus certainly within the scope of TPVG’s “core operations.” As such, there can be no doubt that  
 7 the Defendants knew of (or, at best, recklessly disregarded) the deterioration of TPVG’s loan  
 8 portfolio, both in terms of the Portfolio Companies’ credit risks and the likelihood that the loans  
 9 would be repaid.

10           **PLAINTIFF’S CLASS ACTION ALLEGATIONS**

11       250. Plaintiff brings this action as a class action pursuant to Federal Rule of Civil  
 12 Procedure 23(a) and (b)(3) on behalf of a Class, consisting of all those who purchased or otherwise  
 13 acquired shares of TPVG common stock during the Class Period, and were damaged thereby (the  
 14 “Class”). Excluded from the Class are Defendant TPVG; its parent, subsidiary and affiliated  
 15 entities; the foregoing entities’ officers and directors at all relevant times (including the Individual  
 16 Defendants); members of the foregoing excluded parties’ respective immediate families; and the  
 17 heirs, successors and assigns of the foregoing and including any entity (including but not limited  
 18 to any trusts) in which any Defendants have or had a controlling interest.

19       251. The members of the Class are so numerous that joinder of all Class members is  
 20 impracticable. Throughout the Class Period, TPVG common stock was actively traded on the  
 21 NASDAQ. While the exact number of Class members is unknown to Plaintiff at this time and can  
 22 be ascertained only through appropriate discovery, Plaintiff believes that there are hundreds if not  
 23 thousands of members in the proposed Class. Record owners and other members of the Class may  
 24 be identified from records maintained by TPVG or its transfer agent, and may be notified of the  
 25 pendency of this action by mail using a form of notice similar to that customarily used in securities  
 26 class actions.

27

28

1       252. Plaintiff's claims are typical of the claims of the members of the Class as all Class  
 2 members have been similarly affected by Defendants' wrongful conduct and violations of federal  
 3 law as complained of herein.

4       253. Plaintiff will fairly and adequately protect the interests of the members of the Class  
 5 and has retained counsel competent and experienced in class and securities litigation. Plaintiff has  
 6 no interests antagonistic to or in conflict with those of the Class.

7       254. Common questions of law and fact exist as to all members of the Class and  
 8 predominate over any questions solely affecting individual Class members. Common questions  
 9 of law and fact here include:

- 10       ● whether the federal securities laws were violated by Defendants'  
        acts and omissions as alleged herein;
- 11       ● whether Defendants' public statements during the Class Period  
        misrepresented material facts about the business, operations,  
        management, and financial condition of TPVG, or were made  
        statements that were rendered materially misleading by virtue of  
        their omission of material facts;
- 12       ● whether Defendants acted knowingly or recklessly in issuing the  
        allegedly false and misleading statements at issue;
- 13       ● whether the price of TPVG common stock was inflated during the  
        Class Period due to the Defendants' conduct complained of herein;  
        and
- 14       ● whether the members of the Class have sustained damages and, if  
        so, what is the proper measure of damages.

15       255. A class action is superior to all other available methods for the fair and efficient  
 16 adjudication of this controversy because joinder of all Class members is impracticable.  
 17 Furthermore, as the damages suffered by individual Class members may be relatively small, the  
 18 expense and burden of individual litigation make it impossible for most if not all Class members  
 19 to individually redress the wrongs done to them. There will be no difficulty in the management of  
 20 this action as a class action.

21       256. Plaintiff will rely, in part, upon the presumption of reliance established by the fraud-  
 22 on-the-market doctrine in that:

- 23       ● Defendants made public misrepresentations or failed to disclose  
        material facts during the Class Period;

- the omissions and misrepresentations were material;
  - TPVG common stock is traded in an efficient market;
  - TPVG's shares were liquid and traded with moderate to heavy volume during the Class Period;
  - TPVG traded on a national securities market -- the NASDAQ -- and was covered by multiple analysts; and
  - the misrepresentations and omissions alleged would tend to induce a reasonable investor to misjudge the value of TPVG's common stock.

Based upon the foregoing, Plaintiff and the members of the Class are entitled to a presumption of reliance upon the integrity of the market.

257. Alternatively, Plaintiff and the members of the Class are entitled to the presumption of reliance established by the Supreme Court in *Affiliated Ute Citizens of the State of Utah v. United States*, 406 U.S. 128, 92 S. Ct. 2430 (1972), as Defendants omitted to disclose material information in their Class Period statements in violation of a duty to disclose such information, as detailed above.

**COUNT I**  
**(Violations of Section 10(b) of the Exchange Act and Rule 10b-5  
Promulgated Thereunder Against All Defendants)**

258. Plaintiff repeats and re-alleges each and every allegation contained above as if fully set forth herein.

19        259. This Count is asserted against Defendants and is based upon Section 10(b) of the  
20 Exchange Act, 15 U.S.C. §78j(b), and Rule 10b-5 promulgated thereunder by the SEC.

21        260. During the Class Period, Defendants: engaged in a plan, scheme, conspiracy and  
22 course of conduct, pursuant to which they knowingly or recklessly engaged in acts, transactions,  
23 practices and courses of business which operated as a fraud and deceit upon Plaintiff and the other  
24 members of the Class; made various untrue statements of material facts and omitted to state  
25 material facts necessary in order to make the statements made, in light of the circumstances under  
26 which they were made, not misleading; and employed devices, schemes and artifices to defraud in  
27 connection with the purchase and sale of securities. Such plan, conduct and scheme was intended  
28 to and, throughout the Class Period, did: (i) deceive the investing public, including Plaintiff and

1 other Class members, as alleged herein; (ii) artificially inflate and maintain the market price of  
 2 TPVG common stock; and (iii) cause Plaintiff and other Class members to purchase or otherwise  
 3 acquire TPVG common stock at artificially inflated prices. In furtherance of this unlawful scheme,  
 4 plan and course of conduct, Defendants, and each of them, took the actions as alleged herein.

5       261. Pursuant to the above plan, scheme, and course of conduct, each Defendant  
 6 participated directly or indirectly in the preparation and/or issuance of the TPVG quarterly and  
 7 annual reports, SEC filings, press releases and other statements and documents described above,  
 8 including statements made to securities analysts and the media that were designed to and did  
 9 influence the market for TPVG common stock. Such reports, filings, releases and statements were  
 10 materially false and misleading in that they failed to disclose material adverse information and  
 11 misrepresented the truth about TPVG's financial condition and business prospects.

12       262. By virtue of their positions at TPVG, Defendants had actual knowledge of the  
 13 materially false and misleading statements and material omissions alleged herein, and intended  
 14 through such statements and omissions to deceive Plaintiff and the other members of the Class. In  
 15 the alternative, Defendants acted with reckless disregard for the truth in that they failed or refused  
 16 to ascertain and disclose such facts as would reveal the materially false and misleading nature of  
 17 the statements made, even though such facts were readily available to Defendants. Said acts and  
 18 omissions of Defendants were committed willfully or with reckless disregard for the truth. In  
 19 addition, each Defendant knew or recklessly disregarded that material facts were being  
 20 misrepresented or omitted as alleged herein.

21       263. Information showing that Defendants acted knowingly or with reckless disregard  
 22 for the truth is peculiarly within Defendants' knowledge and control. As the senior managers  
 23 and/or directors of TPVG, the Individual Defendants had knowledge of the details of TPVG's  
 24 internal affairs including, inter alia, the financial condition of the Selected Companies in which  
 25 TPVG invested and the true risk (including risk of loss) associated with TPVG's loans to or other  
 26 investments in those Companies.

27       264. The Individual Defendants are liable both directly and indirectly for the wrongs  
 28 complained of herein. Because of their positions of control and authority, the Individual

1 Defendants were able to and did, directly or indirectly, control the content of the statements of  
 2 TPVG. As officers and/or directors of a publicly-held company, the Individual Defendants had a  
 3 duty to disseminate timely, accurate, and truthful information with respect to TPVG's businesses,  
 4 operations, future financial condition and future prospects. As a result of the dissemination of the  
 5 aforementioned false and misleading reports, releases and public statements, the market price of  
 6 TPVG common stock was artificially inflated throughout the Class Period. In ignorance of the  
 7 adverse facts concerning TPVG's business and financial condition which were concealed by  
 8 Defendants, Plaintiff and the other Class members purchased or otherwise acquired shares of  
 9 TPVG common stock at artificially inflated prices and relied upon the integrity of the market for  
 10 those shares and/or upon Defendants' actionably false and misleading statements disseminated,  
 11 and were damaged thereby.

12       265. During the Class Period, TPVG common stock was traded on an active and efficient  
 13 market. Plaintiff and the other members of the Class, relying on the materially false and misleading  
 14 statements described herein which the Defendants made, issued or caused to be disseminated, or  
 15 relying upon the integrity of the market, purchased or otherwise acquired shares of TPVG during  
 16 the Class Period at prices artificially inflated by Defendants' wrongful conduct. Had Plaintiff and  
 17 the other members of the Class known the truth, they would not have purchased or otherwise  
 18 acquired said securities, or would not have purchased or otherwise acquired them at the inflated  
 19 prices that were paid. At the time of the purchases and/or acquisitions by Plaintiff and the Class,  
 20 the true value of TPVG common stock was substantially lower than the prices paid by Plaintiff  
 21 and other Class members. The market price of TPVG common stock declined sharply upon public  
 22 disclosure of the facts alleged herein, causing injury to Plaintiff and Class members.

23       266. By reason of the conduct alleged herein, Defendants have knowingly or recklessly,  
 24 directly or indirectly, violated Section 10(b) of the Exchange Act and Rule 10b-5 promulgated  
 25 thereunder.

26       267. As a direct and proximate result of Defendants' wrongful conduct, Plaintiff and the  
 27 other members of the Class suffered damages in connection with their respective purchases,  
 28 acquisitions and sales of shares of TPVG's common stock during the Class Period, as the

1 previously concealed truth concerning TPVG's business, operations, investments, and financial  
2 condition was disclosed to the investing public.

**COUNT II**  
**(Violations of Section 20(a) of the Exchange Act  
Against the Individual Defendants)**

5       268. Plaintiff repeats and re-alleges each and every allegation contained in the foregoing  
6 paragraphs as if fully set forth herein.

7       269. During the Class Period, the Individual Defendants participated in the operation  
8 and management of TPVG, and conducted and participated, directly and indirectly, in the conduct  
9 of TPVG's business affairs. Because of their senior positions, they knew the truth concerning the  
10 material adverse non-public information about TPVG's business, operations, investments, and  
11 financial condition that had been misrepresented or concealed.

12        270. As officers and/or directors of a publicly owned company, the Individual  
13 Defendants had a duty to disseminate accurate and truthful information with respect to TPVG's  
14 financial condition, operations, investments, and financial condition, and to correct promptly any  
15 public statements issued by TPVG which had become materially false or misleading.

16        271. Because of their positions of control and authority as senior officers and/or directors  
17 of the Company, the Individual Defendants were able to, and did, control the contents of the  
18 various reports, press releases and public filings which TPVG disseminated in the marketplace  
19 during the Class Period concerning TPVG's results of operations. Throughout the Class Period,  
20 the Individual Defendants exercised their power and authority to cause TPVG to engage in the  
21 wrongful acts complained of herein. The Individual Defendants were, therefore, "controlling  
22 persons" of TPVG within the meaning of Section 20(a) of the Exchange Act. In this capacity, they  
23 participated in the unlawful conduct alleged which artificially inflated the market price of TPVG  
24 common stock.

25        272. Each Individual Defendant, therefore, acted as a controlling person of TPVG. By  
26 reason of their senior management positions and/or being directors of TPVG, each of the  
27 Individual Defendants had the power to direct the actions of, and exercised the same to cause,  
28 TPVG to engage in the unlawful acts and conduct complained of herein. Each Individual

1 Defendant exercised control over the general operations of TPVG and possessed the power to  
2 control the specific activities which comprise the primary violations about which Plaintiff and the  
3 other Class members complain.

4        273. By reason of the above, each Individual Defendant is liable pursuant to Section  
5 20(a) of the Exchange Act for the Section 10(b) violations committed by TPVG.

## **PRAYER FOR RELIEF**

7 WHEREFORE, Plaintiff demands judgment against Defendants as follows:

A. Determining that the instant action may be maintained as a class action under Rule 23 of the Federal Rules of Civil Procedure, and certifying Plaintiff as the Class representative;

10 B. Requiring Defendants to pay damages sustained by Plaintiff and the Class by reason  
11 of the wrongful conduct alleged herein;

12 C. Awarding Plaintiff and the other members of the Class prejudgment and post-  
13 judgment interest, as well as their reasonable attorneys' fees, expert fees and other costs; and

14 D. Awarding such other and further relief as this Court may deem just and proper.
